WAINWRIGHT OIL FIELD FULLY PROVEN BY "STRIKE"

DRILLERS AT IMPERIAL OIL WELL AT FABYAN STRIKE HEAVY FLOW OF WET GAS

Several Oil Drills Preparing to get to work as Soon as Possible. Wainwright Oil Development Co. Will Be Drilling Inside Four Weeks.

Wednesday morning, April 19, will possibly stand out as a red-letter day in the history of our town.

It was very early in the morning when the news was phoned to The Star that the Imperial Oil Co.'s well at Fabyan, just six miles from town and where drilling has been in progress for several months, was "blowing."

It was reported also that oil and mud was shooting almost to the top of the derrick, a structure some 120 feet high, and one of the finest in the province, it having been erected for the express purpose of the use of a "rotary" drill—the first of its kind to be used in Alberta, and possibly in Canada.

The utmost secrecy is still being observed by the officials and employees at the well, but the "strike" was witnessed by several of the farmers living in the neighborhood, and an eye witness states that following a roaring and rumbling noise which could be heard for a great distance, a great cloud of city mud and stones was suddenly shot high into the air, and the well plastered itself stands as mute evidence that "sure something came."

This seepage was blown, by the west wind blowing at the time, for a considerable distance from the well and contains fair-sized stones and oil sands all covered with an oily film.

Several parties travelled by auto to the well as soon as the news became general, but the "No Admittance" signs at the well site and the faithful em-ployees on "sentry duty" in addition to keeping venturesome spirits from getting too close to the premises, also assisted in keeping the secret of the actual "find" from the world at large.

It was just roughly one week after the drillers had started work with a standard rig (after going down with the rotary drill as far as was thought necessary) that this flow was struck and although The Star is not in a position to state just the gas pressure encountered it will be fully recognized that with the gas pressure at the Grattan Coulee gas well—which, by the way, was left as a gas producer only—at something like 700 lbs to the sq. inch, and this latest hole giving off gas with such a roar and force as to be heard for miles there can be no doubt that the company, who have stated that they are determined to most thoroughly test the Wainwright field for oil, are upon the eve of a marvellous find of "fluid gold," and that the Wainwright Oil Field (of which maps are now available) is proven to be far and away beyond the mythical stage.

Gate valves, head caps, and other necessary technicalities were at once rushed to the well site from Calgary, but even after some of the work of placing these in position had been accomplished, another though smaller "blow" was reported to have taken place on Saturday morning.

Considerable interest will attach to this latest strike for the particular reason that it will without doubt prove the justification of a number of our townsmen in the formation of the Wainwright Oil Development Co., the Baxter Lake Oil Co., and other concerns one or two of which we understand have already completed arrangements for drilling on their holdings.

A point for great consideration is the fact, too, that the new field which is being positively proved by this latest "strike" is purely and simply the "Wainwright Oil Field" and on account of a different terrace formation of the anticline this should not be confused with what has been termed the Irma field.

In the case of the Wainwright

FARM MANAGERS APPOINTED FOR GOVT. INSTITUTIONS

Muresco, the new wall finish is obtainable from the Atlas Lbr. Co.

Farm managers for the two Government farms at Ponoka, Mental Hospital and at the new home for mental defectives just North of Edmonton have been appointed. S. W. King of Claresholm Farm, a graduate of Guelph while Neil McKinnon of the College, will be manager of the farm at the Ponoka Institution, and Sedgewick Demonstration Farm will manage the farm near Edmonton. This is in accordance with the policy adopted by the new Government at the beginning of the year, of placing all farms in connection with Government Institutions under the direction of the Department of Agriculture.

field, which is the latest field to receive attention and development, the structure of the strata is shown to be localised on Wainwright district and by an easterly direction therefrom, whereas with other oil fields to the west they are proved to be running at and from a southerly point around Monitor to the Birch Hills and northerly beyond; this field too has only been actually proved at the town of Viking, which has several flowing gas wells exist.

Wainwright, therefore, being already a populous and thriving town and a divisional point on the Canadian National railway, with such added facilities as these features give, is without doubt "on the map" (and by this we mean "On The Oil Map of Canada.") and in addition, is undoubtedly there to stay.

Another big feature of the development of the mineral resources of our district, i.e. that district included in the latest "Wainwright Oil Map" is the carbonate of soda deposits at Baxter Lake some short distance out of town to the north-east. These deposits have been all sampled, no less than over a dozen different test holes having been bored for that specific purpose, and after a full and complete analysis by university, commercial and independent expert analysts, have shown this deposit to be of large area, and almost as chemically pure as it is possible to find anywhere in the world.

On two or three days last week the Imperial Oil Company had different experts in their employ at other places, travel to Wainwright and these were taken out to the Fabyan well by auto, but beyond wearing a very satisfied look and "the smile that won't come off" these gentlemen gave out no information for the public; but despite the secrecy maintained, it is safe to say that the Wainwright Oil Field is now proven beyond a doubt, and only time will tell to what lengths development will ultimately go.

It is sincerely hoped that ere long the drillers will be enabled to continue their labors after shutting off the gas flow, and it seems reasonable to suppose that within possibly a very short distance further down, the big body of oil which undoubtedly is the primary cause of the gas and its wonderful pressure, will come gushing to the top or at least rise to such a height in the wells that pumping will be accomplished with ease, in which case the Wainwright Oil Field should almost prove to out-Midas Midas!

DAIRY CALF PROFITABLE WHEN PROPERLY TENDED

In Holland, where the cattle are all of dairy type and breed, veal is perhaps the most palatable and tempting meat product offered on the menu. The same is true of France. Veal in England is also good. The result is that in all these countries the demand exceeds the supply and prices have risen to such an extent that even in England the slaughter of veal calves has threatened the maintenance of the beef population of the country. The dairy calf may be made to contribute a profitable return to its owner, and a substantial addition to our meat supply, but he must be fed and marketed as a calf. There is no place for the dairy steer, whether reared around a straw stack or given decent feed, in a comfortable barn.

"The dairy calf is going to be with us in increasing numbers and, as the product is not exportable, we may as well accept the task of putting it upon the market in as attractive and palatable a form as possible, in order that by increasing consumption we may develop an outlet which will regularly and profitably absorb all that we can produce."—Mr H. S. Arkell, Dominion Livestock Commissioner.

WAINWRIGHT TOWN BAND IS NOW UNDER BUSINESS MANAGER

The public meeting called by the Town Band for the purpose of discussing the advisability of "carrying on" during the summer, although very poorly attended by the business men was nevertheless a very enthusiastic one, and it was unanimously decided by the bandmen that they would carry on and be open for any engagements that might offer.

President Suckling presided and in a few words outlined the purpose of the meeting and also the advisability of placing the band under a business manager who would have sole control in the matter of arranging engagements etc. After some discussion Mr J. L. Gorow was nominated as president and manager and Mr F. G. Pawling as secretary-treasurer, both being elected.

At the conclusion of the election of officers, several members were called upon for a few remarks and before the meeting adjourned a hearty vote of thanks was extended to the retiring president Mr W. T. Suckling for his efforts on the band's behalf during the past year.

WAINWRIGHT I.O.O.F. MEMBERS HOLD A PROGRESSIVE WHIST

Although not so well attended as possibly some of their previous efforts, the progressive whist party held by the members of the local lodge of the I.O.O.F. on Wednesday evening last was a decided success, and an enjoyable time was experienced.

The younger set of the sister lodge of Rebekahs arranged a real dairy lunch and served the same, and thanks are due to them.

The prize winners were as follows:—

1st Lady—Miss Vene, 113.
2nd Lady—Mrs. Sayer, 112.
Consolation—Mrs. B. Laird, 92.
1st Gent—W. Yeager, 91.
2nd Gent—H. Wilbrie, 118.
Booby—J. Tolinie, 90.

The U.F.W.A. are announcing a big fancy work bazaar to be held in the restaurant on Saturday May 6th. Handkerchiefs and candles will be a specialty. Every body is invited.

LOCAL NOTES

Mr W. Goulet, is away on a trip to Winnipeg this week, on business connected with his agencies. Hope he'll have a good time—almost wish we were with him!

The Presbyterian church manse is being redecorated inside this week. Mr Fred Gordon has the job in hand.

Sympathies are being extended to Mrs. A. Labonte who is suffering from a severe attack of pneumonia. We wish her speedy recovery.

Miss Edna Smith, of Kisbey, Sask., who was an Easter visitor at the home of her cousin, Mrs. (Dr) Wiley, returned home on Sunday.

Mr J. Robinson is a sufferer from the prevalent epidemic of measles, and "Jim" sure has sympathy.

Among those attending from this centre at the C.G.L.T. northern Alberta conference in Edmonton last week end, were the Misses M. Scofield, E. T. T. and H. T. T. Over 200 girls were in attendance and the senior Wainwright group sent Miss G. Olson as their delegate.

Mr and Mrs J. Bisson arrived home from their honeymoon on Sunday's train.

Mr Roht Kemp, representing the "Bapco" paint Co. spent a few days in town this week.

Mrs H. Y. Pawling entertained on Thursday evening last in honor of Miss Bessie Parsons, who was her guest for the Easter holidays, when quite a number were present.

Let the insurance company pay YOUR fire loss. See Joe Welch.

Mr J. Gano is now busy with the brush and can. He is assisting in the auto-paint shop of Mr F. Stott.

The local chauffeurs certainly did a fine stroke of business on Wednesday, when everybody and his wife wanted to see the oil well "gushing."

Farm fires seem to be prevalent these days. Only a week or so ago Mr G. Rydale south-west of town suffered a complete loss of his home, and last week end the buildings occupied by Mr S. McCarty on the Geo. Smith farm south of Fabyan were burnt to the ground.

We learn from the local telephone agent, Mr O. Michon, that there are to be three new lines constructed and added to the Wainwright exchange this spring.

CONSIDER THE OLD HEN—SHE DOESN'T QUIT SCRATCHING WHEN WORMS ARE SCARCE

We'll say she don't!

On the other hand, when the pickin' is poor she does more scratching than ever before, going over the back yard with a fine tooth scratcher, so to speak, and more than that—she invades new territory and opens up new fields of endeavor.

How many of us can learn a lesson from the homely hen, instead of sitting idly by and waiting for it to "pick up again" proceeded to do more advertising—more intensive advertising—better advertising than ever before.

And not only that—can't we, too, open up new fields—reach out farther with direct-by-mail, newspaper and other forms of sane publicity, and like the old hen, increase our scratching radius? We stand ready with a linotype machine, good presses, paper and ink—and more important yet—the knowledge necessary to operate them, in the successful production of high-class printed advertising. In other words we furnish the scratcher. Here's to the old hen long may she scratch. And may we have sense enough to profit by her example.

TOURISTS CAMPS TO BE ERECTED IN JASPER NAT. PARK

A modern tourist camp, commanding a wonderful view of all the prominent mountain peaks, is now under construction—on the shores of beautiful Lake Beauvert in Jasper National Park.

The new camp will open June 15th to September 15th, 1922, and will consist of several lodges which will be up-to-date in every particular, including running water, electric light, sanitary arrangements, etc.

Each building will have four bedrooms (with double or single beds) sitting room and there will be accommodation for 75 guests.

There is also being erected a central lounge building with open fire place and furnishings of rustic design and requisite to the comfort of guests. A dancing pavilion is already located on the site.

The erection of these lodges will greatly meet the increasing demand for accommodation at Jasper, Park. That the tourist tide will flow through the Jasper Park gateway to and from the Pacific Coast this season is assured as it has been the desire of American and Canadian tourists to visit this wonderful Jasper National Park when first class accommodation was provided.

"CITY OF MASKS" TELLS NOVEL PHASE NEW YORK LIFE

In "The City of Masks," coming to the Elite theatre tonight and tomorrow Robert Warwick leads a "double life." Generally this term has rather unsavory significance. But in this picture the masquerading results in a story that is refreshingly novel in plot.

The "City of Masks" is New York, and according to George Barr McCutcheon, author of the story, the metropolis is crowded with chauffeurs and governesses and politicians who are really persons of noble rank disguising their identities in humble occupations. Once a week they meet at a certain house and dress and act as they did in "the good old days." Mr Warwick has the role of a chauffeur, who is Sir Eric Temple to his familiars. He falls in love with a governess, also of noble birth, and while protecting her from the attentions of her rich employer's son, becomes involved in adventures with counter feivers and the police, finally carrying the day, of course.

COLONIZATION OF IRRIGATION DISTRICT BEING STARTED

Steps toward the colonization of the Lethbridge Northern Irrigation District are now being taken by the Irrigation Council of the Government. Listings of land which farmers in that district will have for sale are now being secured. Farmers are urged to reduce their holdings to 160 acres, and are warned that prices they ask for surplus lands must be reasonable, and in the neighborhood of \$2000 including irrigation charges. The government will make a commission charge of \$200 per acre for land it sells; the commission money to go into a general fund for colonization purposes. L. C. Charlesworth, Chairman of the Irrigation Council, will have general charge of the irrigation plans.

The date has now been definitely decided, and the local Dramatic club will produce their play "A Little Bit of Color" at the theatre on Friday, May 12th.

GOVT STALLIONS WERE NOT SOLD

The two Government stallions Craigie Masterpiece and Job, were not sold when offered at auction last week at the Edmonton Horse Show. They will remain the property of the Department of Agriculture and will be administered according to a new policy outlined by the Minister of Agriculture, Mr Hoadley. Questionnaires are now being sent out to ascertain from breeders the number of mares available in each district.

The best Spring tonic for horses, cattle, pigs poultry, etc., is International Stock Food from the Wainwright Pharmacy.

THE EXAMINER'S WEEKLY REVIEW OF PROVINCIAL MARKETS

(Thursday, April 20, 1922.)

CATTLE
Beef—Splendid quality shown in a lot of the fat stuff at Edmonton yards this week, with some of the spring show cattle helping to strengthen the tone. Choice steers, light and heavy, \$6.25 to \$6.50; good, \$5.50 to \$6; medium, \$4.50 to \$5; common, \$2.50 to \$3; canners down to \$1.25. Choice heifers will bring a dollar over cows. Bulls advanced, with best at \$3.60; \$3.25; medium and canners, \$1.60 to \$2.50. Calves unchanged, with tops \$7.00 to \$8; common, \$3.00 to \$4. Feeder and Stockers—Demand better and choice feeders, \$4.75 to \$5; stockers, \$3.84. Keep buying on all classes of cattle.

HOGS
Edmonton market held at last week's figures up to Wednesday, when price dropped to \$11.60.

SHEEP
Sheep—Good demand at Edmonton, and prices stronger, with choice lambs from \$12 down to \$8.50; ewes, \$7.50 down.

GRAIN
Wheat has been taking some wide swings since last issue, and some holders are fairly confident that they will be able to sell on a basis of \$1.50. Fort William, and there is a chance that they will, but at present it looks as though it would be largely governed by crop news. Alberta has not been able to get much seeding done during the week, but the moisture which has fallen will be beneficial, and there is time yet to do a lot of spring work.

PRODUCE
Eggs—Edmonton prices advanced to 24c; receipts largely increased and season ahead of last year. Creamery Butter—Prints, 39c; Creams, 40c; no surplus and local demand taking care of make Dairy Butter—While creamery is scarce, there is a better demand for dairy, but only first class stuff wanted. Cheese—Local cheese selling at 20 1/2c; prospects of increased production. Poultry—No fresh arrivals; storage stock being well cleaned up, with export to eastern provinces, U.S. and old country.

HAY
Serious congestion of free freight orders, which bad roads are holding up, as deliveries cannot be made; free buying has to be done in some cases to fill rush orders, at prices \$16.00 to \$18 on upland, but \$12.00 to \$14; timothy scarce, and dealers paying farmers \$21.50 to \$22 at shipping points. Looks as though free freight regulations would have to be extended to make deliveries.

FURS
Market dull and prices lower pending New York auction next week. Short haired furs likely to go lower.

HIDES
No encouraging signs in the market. U.S. duty would be the finishing touch.

IN MEMORIAM

In loving memory of H. J. Channell, who died in the General Hospital Edmonton, April 26th, 1921.

He sleeps at rest for evermore. The strife is done; the tumult's o'er.

HEAD OF NATURAL RESOURCES BRANCH C.N.R. VISITS TOWN

Mr E. A. Blow of the Canadian National Railways resources Department, who was a business visitor this week in connection with land settlement work, states that there is a prospect of a fair immigration this year both from the United States and Great Britain, and thinks the total at the end of the year will show a much greater influx than last year. The territory into which the new settlers are going is so extensive that with a few going here and a few going there, the movement is scarcely perceptible at any particular point, and for this reason it is thought generally that the movement is slow, but taking the country as a whole there is more land settlement going on than is supposed by most people, Mr Blow says.

Our visitor stated that quite a number of communities in districts where lands are available for new settlers are organizing special reception committees to get in touch with the new arrivals who have already secured land, as well as prospective buyers, and extend them a hand of welcome and help them in little matters in which they may need information or advice.

WAIN. ATHLETIC CLUB HOLDS SECOND ANNUAL GENERAL MEETING

The second annual general meeting of the Wainwright Athletic Club was held in the Town Hall on April 12th. Officers Present Davidson, Frickleton, Lissimore and Cork.

Moved by Mr Siddall and seconded by Mr Frickleton—That Mr Davidson take the chair in the absence of the President—Carried.

Moved by Mr Frickleton and seconded by Mr Lissimore—That the minutes of the last annual meeting be adopted as read—Carried.

Moved by Mr Siddall and seconded by Mr Frickleton—That the Auditor's report be accepted—Carried.

The following officers were then duly elected to hold office during the next club year ending March 31st 1923:

President—Earl L. Cork.
Vice Pres—Earl Frickleton.
Secretary—Thos Lissimore.
Treasurer—H. Y. Pawling.
Executive—Mayor C. T. Lally and Messrs G. Siddall, H. Hoegh, W. Blinn, D. Davidson, W. Brown and A. Hancy.

Moved by Mr Siddall and seconded by Mr Greer—That a vote of thanks be tendered the retiring President (Dr H. Wallace) and members of the executive for their persistent efforts in face of adverse circumstances during the past year—Carried.

Moved by Mr Frickleton and seconded by Mr Lissimore—That a vote of thanks be tendered the Auditor (Mr W. J. Huntingford) for the valuable services rendered the Club—Carried.

The meeting then adjourned.

CROSSING THE BAR

ELIZA ANN FORD

There passed away on Monday at the home of her son Mr J. W. Ford, 31-44-44; Mrs Eliza Ann Ford, at the ripe age of 73 years. The deceased lady who has been sick for many months, came to this district some eleven years ago from Rathwell, Man., at which place she lived for twenty years after moving there from her birthplace (Oakville) in Ontario—and has made a host of friends, all of whom join in expressing sympathy to the relatives in their bereavement.

The funeral will be held tomorrow (Thursday), interment being at Edgerton. McLeod's undertaking parlors have charge.

RED ROSE TEA is good tea

Always Pure and Clean and Kept Good in the Sealed Package

The Miracle Of Spring

Spring has come again with all that it implies of hope, rebirth, optimism, growth, youth and happiness. Spring, the ever recurring miracle of the ages! It is only necessary to open one's eyes to realize the wonders of Spring all around. Brooks and rivers, joyfully break their icy fetters and go leaping, rushing on their way; trees throw out their leaves; seemingly dead and dried grasses almost overnight take on a lustre of green; birds appear miraculously and fill the air with song. In a word, all nature awakes from its long sleep and thrills with life and the joy of living.

And what Spring means and brings to nature it should mean and bring to all mankind. Just as the cold earth yields to the benign influence of the growing strength of the sun's rays, and casts off the iron bands which have held it in frozen grip, so should man respond and throw off the lethargy and pessimism of winter and renew his youth and vigor with Spring.

Of course, men do not wait for the coming of Spring and the renewed activity of nature, undertake those duties of the farm which the season brings, while in the cities artisans are again employed in structural work. But Spring should mean to all men and women a deeper, more significant message than merely a call to summer's work.

Spring is the season of hope and promise. It is the time of year when all may turn their backs and their minds on the past and look forward with confidence to the future.

The winter of 1921-1922 was a hard and discouraging one for many people. To some it was a time of hopelessness and even acute suffering. Inevitably it caused a lowering of one's morale, a weakening of one's courage, discouragement, and the development of a feeling of pessimism about the future. Nature seemed cruel, and the efforts of man to withstand its vagaries and onslaughts appeared weak and futile.

But with Spring, nature comes in a happier, smiling mood. It offers encouragement. One's first effort, therefore, should be to respond to this kinder mood, and to shake off the pessimistic feelings of the past, to turn from the dark forebodings of winter, to forget past discouragements, and to face the future with confidence and a brave countenance.

Recognizing the fact that environment has a great deal to do with one's state of mind, it is the part of wisdom to improve that environment in every way possible. A man cannot make a success of things if all around him are evidences of failure; progress and efficiency are not born in surroundings marked by sloth and carelessness. Winter always is characterized by accumulations of useless and waste material, and the melting of the snows reveals much unsightliness which is most depressing.

A general, vigorous "clean up" should, therefore, be the first Spring duty. Clean up the house clean up the yard, remove and destroy the refuse of winter, repair that broken fence, judiciously employ a little paint. Remedy all those little things which give a rundown, shabby, unprogressive, unprosperous appearance to your place. A little time will do it, and the effect on yourself and your family will be amazing. And don't forget to clean up your own thoughts and ideas. Bury out of sight your old forebodings and gloomy predictions. When washing your house windows don't neglect to clean the windows of your mind and soul.

Demoralizing outward conditions have a depressing effect on the inner man, but it is from within that must come the will to improve those outward conditions. To allow the sluttishness of winter to continue means, not life, but death. Just as nature throws off the shackles of winter and responds to the appeal of Spring, so must each and every individual refrain from further dwelling upon the discouragements and losses of the past and throw themselves wholeheartedly into the present with their eyes fixed on the future and their energies spurred on by an inflexible ambition to succeed—employed in constructive work.

A Spring clean up is good business from the purely practical standpoint. The removal of waste is always wise. It is a matter of economy. It is a safeguard of health. But it also has a beneficial effect on oneself. It refreshes the individual, and if a material clean up is accompanied by a readjustment and betterment of one's outlook on life and its problems, a long step forward has been taken.

Japanese Demand For B.C. Lumber

Will be in Market for Many Years to Come

The unprecedented demand of Japan for British Columbia lumber last year was not merely a temporary development, but an indication that Japan will be in the market for this province's forest products in large volume for many years to come, according to Y. I. Si Lo of Kobe, who arrived at Victoria with a party of Japanese lumber and pulpwood buyers, said to represent \$25,000,000.

Pave Street With India Rubber

A street in the suburbs of Copenhagen may be paved with India rubber, which is said will last for fifty years. The offer has just been made to the municipal authorities of Copenhagen by a rubber manufacturing company. The sample rubber street would be 320 yards long. The company claims that the proposed road would be far superior to ordinary ones.

Probably the queerest norm shown in the world are those employed in the Sudan. They are not really shoes, but stockings made of camel's skin.

ECZEMA

When ordering goods by mail, send a Dominion Express Money Order.

BELTING FOR SALE

All kinds of belting, new and used, shipped subject to approval. I have a full line of rubber belting guaranteed quality. Twenty cent per foot, all others at lowest prices in Canada. YORK BELTING CO., 112 York St., Toronto, Ont.

BLACK LEG

100% PROTECTION FOR LIFE

From one vaccination with Cutter's Liquid or Solid Blackleg Vaccine, absolutely safe. Cutter's Liquid Vaccine works just like the Blackleg Pills. Cutter's Liquid Vaccine is unobtainable locally, write to the Cutter Laboratory, Berkeley, U.S.A. (Lombard California).

HOOK ON DOG

How to Feed and How to Train. Mail Free to any Address by the Author.

H. CLAY GLOVER, 725 West Fourth Street, New York, U.S.A.

U.S. Reduces Navy

Estimate Has \$121,000,000 Decrease Under That of Last Year

The 1923 U.S. naval bill, carrying out the five-year ratio, was reported to the House recently. It carries a total of \$233,234,000 or \$181,000,000 less than appropriated for the United States navy last year. There remains to be appropriated in a separate measure later, however, about sixty million dollars, estimated by the navy department as the cost of cancellation of contracts for ships not completed and ordered scrapped.

Briefly, this is what the bill does: Cuts the entire personnel from 95,000 to 85,000, plus 2,000 apprentices.

Leaves officer totals substantially intact, except for the dropping of 380 reserve officers on active duty.

Authorizes commissions for only 200 of the first-class men at Annapolis, to be graduated in June.

Lays up 254 vessels of "non-descript" character.

Eighteen battleships are allotted to the United States under the new treaty.

In rounding out the fleet the bill reduces the number of destroyers from 278 to 103; authorizes 84 submarines all the cruisers and lighter auxiliary craft.

Out of the 67,000 enlisted personnel it provides that 60,000 be for ships afloat.

Provides for the same number of officers in marine corps and 19,500 enlisted men, a reduction of less than 1,000. The number the navy advised the committee will be cut to 17,500 with the withdrawal in the next year of 2,000 marines from Santo Domingo which will not re-enlist.

For Hiccups and Heartburn Here is a Good Prescription

Nothing brings such satisfactory relief as slowly sipping a few drops of "Nervine" in sweetened water. Nervine relieves those conditions that cause the hiccup, just as it does sour risings, gas belching and fermentation in the stomach. For acute stomach trouble, bloating and similar ills, try on trusty old Nervine—the true friend of every family. Sold by all dealers, 35c per bottle.

World Record for Daily Newspaper

London Daily Mirror Claims Achievement for Royal Wedding Number

The Daily Mirror claims to have broken all daily newspaper records when it published 3,525,571 copies of its Royal Wedding Number, which it believes to be a world daily newspaper record. There were two Daily Mirror sovereign numbers—the Princess Mary Number of Tuesday, and the Royal Wedding Number, of Wednesday. Of the Princess Mary number 2,156,000 copies were printed—an output which is believed to exceed anything yet done in the history of the Daily Mirror or its contemporaries.

That record was broken within twenty-four hours by the issue of three millions of the Wedding Number. Mechanically, it was a tour de force, for the eight pages of wedding pictures went to press four hours after Princess Mary's return to Buckingham Palace. Some previous figures of Daily Mirror prints are: 1910, King Edward's Funeral, 2,012,942; 1914, Cenotaph unveiled, 1,967,685; 1914, Birthday Number, 1,892,629; 1915, Fashion Number, 1,764,480.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Women mountian climbers in Switzerland, if they value their complexions, smear their faces with soap to protect them from the rays of the sun.

Many sailors have a prejudice against ships whose names begin with "T."

A new kind of glove fastener made another man rich, and a sleeve link which could be put in and removed more easily than others made its inventor a present of an income of \$50,000 a year.

The man who invented the little dress fastener with a hump to replace the old hook-and-eye accumulated a vast fortune.

Minard's Liniment for Dandruff

How Times Have Changed

The School Board of Lancaster, Ohio, in 1828, refused to allow any one to discuss railroads in the building. They said: "You are welcome to use the schoolhouse to debate all proper questions in, but such things as railroads and telegraphs are impossibilities and rank infidelity. There is nothing in the word of God about them. If God had designed that His intelligent creatures should travel at the frightful speed of 15 miles an hour by steam He would have clearly foretold it through His holy prophets. It is a device of Satan to lead immortal souls down to hell."

After a man has made a fool of himself he realizes what a fun-loving lot of acquaintances he has.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then lift it off with your finger.

Freezone for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Quickly Conquers Constipation

Don't let constipation poison your blood and curtail your energy. If you live and bowels don't work properly take CARTER'S Little Liver Pills. They are a sure cure for constipation, biliousness, headache and bloated skin nothing can equal them. Purely vegetable. Small Pills—Small Dose—Small Price.

Early Almanacs

Almanacs became prevalent during the fifteenth century. The first almanac to be printed in Europe was the Kalendarium Novum, the author being Regiomontanus. The almanac was issued three years—1475, 1494 and 1514, was sold for 10 crowns gold, and circulated throughout Hungary, Germany, Italy, France and England. England's first calendar was the Shepherd's Kalendar which translated from the French, was printed in 1497. Each month started with an appropriate poem.

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhappy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

The Oldest Flag

Danish Royal Standard Was Adopted By King in 1219

Our Royal Standard, in which some changes will possibly be made as a result of Ireland's new status, is not so venerable as the Danish Royal Standard—the oldest national flag in existence. The white cross on a red ground of the Dannebrog is traditionally traced to a vision seen in the sky by a Danish King, Vladimir the Victorious, when leading his army against the Estonians near Reval in 1219. According to one version of the legend, the blood of the king fell from heaven into the Danish ranks. There is no doubt that about the date of this battle it was adopted as the Danish flag and that it had the religious associations which belonged to most national standards in medieval times.

To Accommodate the Railroad

Darkey Knew Why Station Was So Far From Town

A New York theatrical magnate had a bad attack of grippe in the winter and went south to recuperate. He stopped a few days in a small town in South Carolina. When he got ready to leave for the north he found the official bus had mysteriously vanished, probably the driver had gone joy riding. There was no conveyance, public or private, to be had; and in order to catch his train the northerner was compelled to labor almost over a mile and a half of dusty road with a bad attack of grippe in the winter and went south to recuperate. When he staggered up to the station there was no one in sight except an old darkey who was sitting on the platform.

"Ung!" inquired the New Yorker, "in the name of goodness did they build this depot so far from the town?"

The old man scratched his head. "I don't know, boss," he said—"onless it wuz because dey wanted to git closer to de railroad!"

Women Can Dye Old Faded Things New

In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can follow. They will restore faded skirts, waists, coats, stockings, sweaters, coverings, hangings, everything, even if also has never dyed before. The perfect home dyeing is sure to spot, fade, streak, or run. Tell your friends what you can do with your old dye is wool or silk, or whether it is linen, cotton or mixed goods.

Our Country

Canada is larger than the United States by 250,000 square miles; contains one-third of the area of the British Empire; is as large as 30 United Kingdoms, 18 Germany's, 33 Italy's; is larger than Australia and twice the size of British India; has a boundary line of 3,000 miles between it and the United States; its seacoast equals half the earth's circumference; is 3,500 miles wide and 1,400 miles from north to south. Do you wonder Canadians feel proud?—Montreal Star.

A Fair Exchange

A rich elderly bachelor named Page found the dropped glove of a charming young lady and returned it with this note:

"If from your glove you take the glove, the glove is love, and that I have for thee."

In reply the young woman wrote: "If from your young man you take the letter p, then page is age, and that won't do for me."—Wayside Tales.

Some people fail to recognize opportunity when it comes up and shakes hands with them.

WORLD HAPPENINGS BRIEFLY TOLD

Unemployment in Berlin has decreased to the lowest figure since the armistice. During the last three months only 14 workers out of every 1,000 were unemployed.

Notice has been served on the Royal Academy in Dublin that all pictures or other exhibits belonging to persons in the southern area must be removed.

More than twenty French soldiers were killed and a dozen wounded while searching for hidden arms in Silesia. A spade struck the detonating mechanism of a hidden mine. The explosion occurred in a cemetery between Gleswiz and Sosnowa.

Customs duty collected on agricultural implements during 1921 amounted to \$1,917,370, out of a total duty collection of \$17,667,883. During the same period, duty collected on foodstuffs amounted to \$25,123,408.

Fellowship of the value of \$500 per annum has been donated for a limited term by the Imperial Oil Company, which will open to graduates of universities in Western Canada who wish to pursue post-graduate work at the University of Toronto.

Ton. John Hart, minister of finance, was sworn in by Lieutenant-Governor Nichol as minister of industries for British Columbia. He will retain the office of minister of finance. Premier Oliver, who has been minister of industries, resigned just before Mr. Hart was sworn in. The Premier will retain the office of minister of railways.

On the Marriage Day

Romance usually ceases, and history begins—and sore corns begin to grow when "Putnam's" is applied. It takes out corns, roots, branches, stems—no trace of a single corn left after Putnam's Painless Corn Extractor has done its work, 25c at all dealers. Refuse a substitute.

Half Blind

Beggar—"Please give a poor old blind man a dime."

Lady—"Why, you can see out of one eye."

Beggar—"Well, then, give me a nickel."

UNSIGHTLY PIMPLES AND FACE ERUPTIONS

In the Spring Most People Need a Tonic Medicine

One of the surest signs that the blood is out of order is the pimples, unsightly eruptions and eczema that come frequently with the change from winter to spring. These prove that the long indoor life of winter has had its effect upon the blood, and a tonic medicine is needed to put it right. Indeed, there are few people who do not need a tonic at this season. Bad blood does not merely show itself in disfiguring eruptions. It causes frequent colds, influenza, rheumatism and lumbago; the sharp stinging pains of sciatica and neuralgia; poor appetite and a desire to avoid exertion. You cannot get rid of these troubles by the use of purgative medicines—you need a tonic and a tonic only, and among all medicines there is none can equal Dr. Williams' Pink Pills for blood-purifying, nerve-restoring power. Every dose of this medicine helps make new, rich blood which drives out impurities, stimulates every organ and brings a feeling of new health and energy to weak, tired, ailing men, women and children. If you are out of sorts give this medicine a trial and see how quickly it will restore the appetite, revive drooping spirits and fill your veins with new, health-giving blood.

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Strange Names in Congress

There were once four Smiths in the United States Senate, but now the "upper branch" of Congress is graced by numbers of strange and unusual names. It is hard to tell whence we sprung when we read the names of such Senators as Atlee Pomerene, Tasker Oddie, Reed Smoot, Holm Bursum, Furnifold McLimmon, Lytle Leuroot, Carter Glass and Nathaniel Dial. What's in a name, anyhow?—Los Angeles Times.

The Way to Work for Peace

Removal of all war causes would seem to be far more vital than determination as to the peculiar weapons to be used in the next conflict.

ROYAL YEAST CAKES

Canadian Made

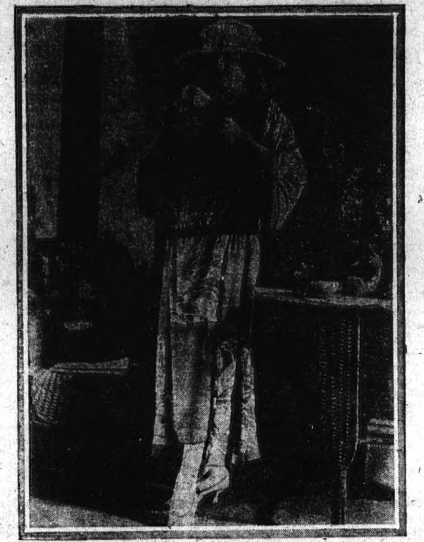

As a health builder, Royal Yeast is gaining in popularity every day. It is a food—not a medicine. It supplies the vitamins which the diet may lack. Royal Yeast is highly beneficial in cases where the system seems "run down." Royal Yeast is the richest known source of vitamins, and when taken into the system acts as a corrective agent. Royal Yeast Cakes are recommended for their purity and wholesomeness. It is the purest, the most convenient and economical yeast on the market.

Two to four Royal Yeast Cakes a day will work wonders. A full day's supply can easily be prepared at one time by using one glass like warm water and teaspoon sugar to each yeast cake. Allow to stand over night in moderately warm room. In the morning stir well and pour off liquid. Place in refrigerator or other cool place and drink at intervals as desired throughout the day.

Send name and address for free booklet "Royal Yeast Cakes for Better Health."

At Tea Time In The South

The wonderful creations that are now on display for Southern wear. This stunning frock is of white silk crepe and a broadened fabric in blue and white uncut velvet. The lines are rather long and square. The side panels are longer than the rest of the frock, giving this mode the uneven hem line which is so popular just now.

World's Smallest Republic

Gorest in The Pyrenees Has Population of About 150

The Lilliputian republic of Gorest, which nestles within the confines of a square mile in the Pyrenees, and is smaller even than the republic of Andorra or San Marino, has had its independence recognized by France and Spain for the past three centuries. It has a population of about 150. The people are ruled by a council of elders, and they pay no taxes or duties of any sort. This civic unit is so tiny that it has to go abroad for its cure of soul and body. For these it has to go to Laurent, the nearest French town. Even the dead must leave Gorest to find consecrated ground in which to lie; the coffins are slid downhill, out of the smallest republic in the world.

Charity is religion with its coat off.

Fatal Street Accidents in Britain

Official figures just published show that there were 2,845 fatal street accidents caused by vehicles in the United Kingdom last year, just eight more than in 1920. The number of accidents which did not prove fatal but resulted in personal injury, increased by over 4,000 to 61,000. In London there were 571 fatal street accidents last year and 22,647 that were not fatal.

Canada's Best Buy - THE ECONOMY PACKAGE

1/2 lb - 85¢ (ALSO PROCURABLE 1/2 lb PACKAGE 15¢)

Reported That Russia Is Now Willing To Acknowledge War Debts

Genoa.—The Bolshevik delegates and the representatives of France to the economic conference broke bread together at the residence of Premier Lloyd George and there has been considerable discussion as to the consequences of the expectations that the conference may have good results, even in the pessimistic quarters here.

The meeting was called by Mr. Lloyd George for a discussion of the Russian programme, with the purpose of clearing up certain points in the London experts' report before the Russians present their final reply to it.

This carrying of the most vital part of the business of the conference into such an informal gathering, where personal contact may possibly remove much of the animosity that has been displayed in the public sessions, has created a general feeling in conference circles that a compromise may be arranged on the Russian problem which will afford a satisfactory working basis for the reconstruction of Russia.

PECULIAR ASSOCIATIONS IN GENOA RESULT OF ECONOMIC CONFERENCE

Genoa.—Politics is making strange associations in Genoa—or rather, economics is doing so, if one chooses to accept the statement, reiterated 50 times daily by its framers, that the Genoa conference is not political. It is certainly unusual to find the Soviet chief, Tchitcherine, sitting vis-a-vis with Constantin Dismadsky. Four years ago the Bolsheviks had Dismadsky in jail at Petrograd. At that time he was the Russian minister, accredited to the Krensky Government, and the diplomats of the whole world were storming against Soviet Russia. The sight of Adolf Joffe and the German chancellor, Dr. Wirth, in conversation, recalls Joffe's very sudden expulsion from Berlin, according to the terms of the Brest-Litovsk treaty, but the German Government unceremoniously loaded him and his entire staff on a special train and shipped them back to Russia, alleging they were propagandists and not diplomats. It also seems odd, for M. Rakovsky and Premier Briand are sitting together at a conference called in the interests of peace. Rakovsky was an active Russian Socialist at the beginning of the war, and the Dugarev Government interned him. Now he is president of the Ukrainian republic, federated with Moscow.

Then there is the cordiality with which the British Premier greets Maxim Litvinoff. His attitudes here do not in the least suggest the stormy time Litvinoff had in England before he became Tchitcherine's chief assistant in Moscow. But in four years the Bolsheviks have made more treaties than the other European states have completed in the past century, so the professional diplomats have to admit the Russians are no novices, and must be dealt with accordingly here.

Women Checks Votes
London.—General checks greeted the selection of Mrs. Margaret Winteringham, Independent Liberal member for Louth, as the first woman to check the votes in the House of Commons in a division lobby. The vote was on an amendment moved by Mrs. Winteringham by which she sought to have women police retained on the London force, but she was unsuccessful.

Children's Library in Toronto
Toronto.—This city is to have the first public library in Canada devoted exclusively to the use of children. A building on George Street, near the College Street public library, has been purchased for the purpose. The children's library will have a reference department for the use of school children.

Dangerous Venture
Panama.—Michael Hedges, a British explorer, planned to start at once on an exploration of the Panama Indian territory from Virgin to White-man. The natives of this region have consistently opposed the entrance of whites, and his venture is looked upon as dangerous.

Famous Picture to be Loaned
London.—Hon. P. C. Larkin, Canadian high commissioner, has obtained from Sir Wm. Orpen, the famous Irish artist, the loan of Sir William's painting "Hall of Mirrors" for the Canadian national exhibition this year.

Changed Attitude Of France Towards Russia Is Noted At Genoa
Genoa.—Delegates from several countries represented at the economic conference remark informally upon what seems to them a changed attitude on the part of France toward Russia. They declare that Louis Barthou, head of the French delegation appears to be especially cordial and conciliatory in his manner toward George Tchitcherine, leader of the Russian group in public meetings. They interpret this as indicating that France is now disposed to go as far as possible towards reaching an understanding with Russia.

Nikolai Lenin, Soviet premier, will come to Genoa to replace George Tchitcherine as head of the Russian delegation when the negotiations at the economic conference reach the proper stage, says the newspaper Secolo. The newspaper adds that an apartment is being prepared for Premier Poincaré of France at the Villa Poggio, and he is expected here shortly.

The meeting of the commission on Russia has been postponed until tomorrow, M. Tchitcherine awaiting instructions from M. Lemire, at Moscow, with whom he is in direct communication.

London.—The reported intention of David Lloyd George, the British premier, to propose at Genoa a pact or understanding that no nation shall attack another is featured in two or three of the London newspapers. "It was never planned the plan may be framed," says the Daily News, "it is bound to be more spectacular than real."

"Mr. Lloyd George has declared that the conference, before it can usefully discuss disarmament, must create a peaceful atmosphere by settling the causes of disagreements which lead to war. He might have added that an efficient instrument already was available both to remove disagreements and to organize disarmament."

Objection to Wheat Board

Montreal.—The establishment of a Government Wheat Board will kill the flour milling industry in Canada, declared General A. E. Labelle, president of the St. Lawrence Flour Milling Company, Limited, addressing the Chamber of Commerce here. He asked the chamber to adopt a resolution protesting against the Government meddling with wheat prices. The chamber approved of the resolution in principle and the secretary was directed to frame the official resolution which will be forwarded to the Government.

Russians Returning To Native Country

Contingent from Canada and U.S. has Reached Moscow.
Sebez.—One hundred and forty-nine Russians from America, 43 of whom are accompanied by their wives and children, comprising the first contingent of more than 2,000 from Canada and the United States who plan to return to their native country, have just had their first view of their new promised land under Sovietism, which they left under Czarism. They are awaiting instructions from Moscow as to where they may settle.

They brought 400 tons of agricultural equipment, which will be used in teaching peasants modern soil cultivation. The unit will be given land which will be virtually theirs, and it is expected they will organize a Soviet wherever Moscow officials decide to send them, which will be in some section where land is plentiful. The unit landed at Libau and passed through Latvia, several Soviet officials accompanying the travellers to their destination. There were several hours' delay at the frontier, after which the newcomers passed the border where they were most cordially greeted by officials from Moscow. They started on their journey full of anticipation for their hopes for Utopia.

Balfour Accepts Title

Yields to Long Standing Aversion in Accepting Earldom.
London.—Formal announcement was made that an earldom had been conferred on Sir Arthur Balfour, former premier and at present lord president of the council. The announcement confirmed what had been unofficially known some time. Throughout his political career he had steadily set his face against the acceptance of any title, even, according to reports, having declined one when offered him on his return from the Washington conference. Then he accepted the Order of the Garter without realizing it, said, that it carried knighthood, and the title "Sir."

Mr. Balfour at last relented, however, and now goes to the more dignified atmosphere of the House of Lords with the title of Earl Balfour of Whittingham. In the upper chamber the Conservative leader will not lose his identity under an entirely new name, as, for instance, Disraeli, when he became Lord Beaconsfield, but will retain his old name as Lord John Morley on becoming Earl Morley.

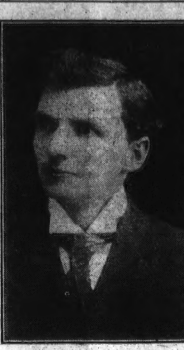

Crucifixion on Cart Wheel
London.—An amendment to the army bill, abolishing "crucifixion" in the army, was defeated in the House of Commons. Earl Haig and Sir William Robertson, former chief of staff, favored the retention of the "crucifixion," which consists of tying the offender to a cart wheel by his legs and arms.

Old Age Pension Plan
Ottawa.—The advisability of the Canadian Government instituting a system of old age pensions will be debated in the House of Commons. Dr. E. LaPointe (Liberal, Hull), has filed a resolution on the order paper.

OLD KING COAL'S FIDDLERS

H. G. Sheldrake, Editor of The Optimist, North Battleford, Sask.

Britain Again Leads In Ship Construction

Orders in Hand Total Over Two Million Tons.
New York.—With world shipbuilding rapidly reverting to the pre-war scale, Great Britain has resumed her great lead over the other countries of the world in the construction of ships of all classes. At the same time the United States, despite the great agitation for increasing maritime power, has fallen behind.

This is disclosed by a statement issued here by Lloyd's. It shows that the shipyards of the United Kingdom have orders in hand totalling over 600,000 gross tons more than before the war. The United States yards have orders in hand for only 136,000 tons, a decrease of about 19 per cent. from the figures for July, 1914. All other countries than the United States and Great Britain with the exception of Germany, for which no authentic figures are available, have under order more than double the pre-war construction aggregate for these nations. The figures showing the amount of shipbuilding order now in hand give a clear indication of the lead held by Britain. They are: United States, 1,235,266 tons; United Kingdom, 2,235,998 tons; all other countries, 1,207,358 tons.

The British Dominion, according to Lloyd's figures now have 62,656 tons under construction, against 66,469 tons on January 1, 1925.

Hawaii Hears Music from Alberta
Calgary.—A concert programme of music played on a phonograph at the Canadian Government wireless station at High River on March 31 last, was heard for half an hour at the town of Waukegan on Mars Island, 100 miles from Honolulu, or just about 2,800 miles from High River, Alberta.

Word to this effect was received by W. W. Grand, wireless chief of the Canadian Government station at High River.

To Obtain Tidal Data
Ottawa.—A number of Canadian representatives will attend the international science conference to be held in Rome next month, where a special effort will be made to establish a uniform system of arriving at tidal data throughout the world. Dr. W. Bell Dawson, of the tidal and current survey branch, Naval Department, one of the Canadian representatives will leave Ottawa for Rome at once.

U.S. Settlers for Peace River
Edmonton.—There is to be a large influx from Wyoming to the Peace River country this month, over twenty-five families leaving Sheridan, April 15, for Edmonton. Francis W. James, a prominent rancher, states that big tracts of land will be taken up for ranching purposes.

Famous Aviator Killed

London.—Sir Ross Smith, the Australian aviator, who with his brother, Sir Keith, had planned to start from Croydon on April 25 for an attempted flight around the world, was killed when his plane crashed in a practice flight at Brooklands. Lieut. Bennett, an engineer, who was planning to accompany Sir Ross and his brother on their around the world flight, also was killed. The machine which crashed was the one the Smiths intended to use in their flight. Capt. Conkerill of the Vickers Company, had previously flown it for a half hour, then handed it over to Captain Smith. As the machine was approaching the airfield to land, it got into a spin and the fatal crash followed.

Large Acreage in Manitoba

Plenty of Moisture and Bumper Crop Yield Anticipated.
Winnipeg.—With an early spring well on the way and plenty of moisture guaranteed for early months, a bumper crop was predicted for Manitoba, 1925 by Hon. G. H. Macdonald, minister of agriculture when discussing the general situation.

"There has never been as much land plowed and ready for seed as there is this year," Mr. Macdonald said. The average in crops for immediate work is placed at 4,802,650 acres, as compared with 4,238,200 in 1921. These figures do not include the spring plowing, which will be under way within the next fortnight. The total acreage sown to crop last year was 7,415,937.

The districts which have been infested with grasshoppers during the past three years are free of the pests this year as nearly as can be judged at this time, and Mr. Macdonald declared that he did not believe these pests would be a menace this year.

Japan Welcomes Prince

Royal Visitor Heartily Greeted by Thousands in Yokohama.
Yokohama.—The Prince of Wales has arrived in Yokohama, Japan, and has been greeted by thousands of Japanese. The British battleship Renown which brought him from India.

His reception was carried out according to the programme to the minutest detail, as in the Japanese custom. The prince was welcomed as no royal as the children who lined the streets are disciplined to silence, but the picture they made with their thousands of waving flags in the hands of the Japanese crowd scarcely be paralleled.

The prince left Yokohama for Tokyo in a special train, three coaches of which were especially built for his use.

Lord Curzon's Note Pleases United States

Britain Recognizes Reimbursement Claim for Army in Germany.

Washington.—Secretary Hughes received from Ambassador Harvey in London, a note from Lord Curzon, Foreign Secretary, which stated that the Government of Great Britain would not in any circumstances desire to question the rights of the United States in its claims for payment of costs of the American army of occupation in Germany. Secretary Hughes later transmitted a note to Ambassador Harvey for delivery to the British Foreign Secretary, expressing his gratification over Lord Curzon's letter and expressing hope that reimbursement for costs of the United States' army in the Rhineland would soon be made.

Robbers Secured Haul
Vancouver.—After checking up with the victims of the recent robbery of safety deposit boxes in the Royal Bank of Canada branch at Ladner, on March 29, the total value of the Victory Bonds and other securities taken has been estimated at \$124,450, according to a statement made by C. W. France, supervisor of branches here. Of this amount only \$25,000 were bearer bonds, the balance being registered.

Honored by the Pope
Quebec.—The announcement was made here officially that three prominent Quebec business men had been honored by Pope Pius XI. Joseph Picard and Onesime Pouliot have been made commanders of St. Gregory the Great, while J. S. Matte has been made a knight of St. Gregory the Great.

Rev. Abbe C. S. Garlepy, rector of Laval University, becomes an apostolic prothotary.

Wireless Service Opened
Genoa.—Wireless service between Switzerland and England was inaugurated with a message from the president of the Swiss Confederation to King George. One hundred words per minute were transmitted.

Anthracite Producers Believe That Miners May Modify Demands

Company Issues Zinc Schedule

Is Considered a Great Advance in Kootenay Mining.
Nelson, B.C.—A zinc schedule, the first in the history of Canadian mining, has been issued by the Consolidated Mining and Smelting Company of Canada in connection with its smelter at Trail, and particularly in connection with a special plan now being built by the corporation to treat the custom zinc ores of the Shewan and other silver-lead-zinc sections on similar lines to treatment of its own enormous tonnage from the Sullivan mine. The plan will be ready some time in June. It is expected that this new departure will lead to the opening of many properties that otherwise would not have an incentive to open, besides assisting many now operating.

The smelter will pay from 60 to 85 per cent of the zinc, for 40 per cent of the gold and the silver in said zinc ore, and for 80 per cent of the lead, less five units. The gold, silver and lead recoveries will be in the smelting of the residues after the leaching out of the zinc, and the smelting charge will be less as the zinc tenor increases. This is the greatest advance in Kootenay mining since the conquest of the complex Sullivan area by the Consolidated at a cost of \$2,000,000.

Asiatic Settlers Not Desirable

H. H. Stevens Appeals for Policy of Restricted Immigration.
Kingston, Ont.—Speaking before the Canadian Club here, Hon. H. H. Stevens, M.P., Vancouver, made a strong appeal for a policy of restricted immigration.

"We want an increase in population," he said, "but we must shut the bars against all races and types that cannot be assimilated by us. By assimilation I mean that we can take British who want to go on the land the Danes, Swedes and Norwegians, all of whom make ideal citizens, but we cannot admit people from Central and Southern Europe and Asia."

Mr. Stevens urged that Canada could not withstand a great immigration movement from China, Japan and India. The white race would eventually be swamped up by so effective a force as was enforced against oriental immigrants.

Rome Police Adopts Bombs

Harmless Invention to be Used Against Riotous Crowds.
London.—The Rome police, according to a special announcement, have decided to use bombs against riotous crowds. The authorities declare the bombs, which are a new invention, are harmless and will simply produce a blinding flash, enabling the police to handle the crowds more easily.

The entire Italian press has strongly condemned the plan, pointing out the likelihood of panics resulting from the explosions, and demanding the use of other methods, such as firemen's hoses.

Arbuckle Acquitted

San Francisco.—A verdict of acquittal was returned by a jury in the trial of Roscoe Arbuckle on a manslaughter charge growing out of the death of Miss Virginia Rappe, motion picture actress. The jury was out six minutes.

The defendant was deeply affected. He received the verdict with a great sigh of relief. There was no demonstration, the court having warned against it. Mrs. Minta Durfee Arbuckle, the defendant's wife, cried quietly. Both she and Arbuckle shook hands with the jurors. The verdict was by acclamation.

Wins Art Prize

Montreal.—A. Y. Jackson, R.C.A., of Montreal, was awarded the Jesse Dow prize for the best oil painting on view at the spring exhibition of the art institute at Montreal. The picture is entitled "Morning After Steel."

Truce Is Declared Between Factions Along The Fermanagh Border

Belfast.—A truce was declared between the Ulster special constables and the Free State troops which have been menacing proximity along the Fermanagh border between Ulster and South Ireland, it is announced here.

Sir Basil Brooke, commanding the Fermanagh special constables, crossed into Free State territory at Blacklion near Belleco, and conferred with the rival leader.

The interview was harmonious and an agreement was reached under which both sides were to withdraw their forces a short distance from the border line to avoid the risk of a clash.

New York.—Anthracite producers notice a tendency on the part of the union leaders to soften their 19 demands when, before the miners and operators sub-committee on wage contract negotiations they asked permission to reconsider their demand number one.

This demand stipulates that a new contract agreed upon in settlement of the pending strike shall extend for two years; prohibits the making of individual agreements and provides for the establishment of uniform wage rates for operators and mechanical laborers.

Operators reported they had balked at part three of the demand, asserting that a uniform rate was already in effect where mechanical laborers were in use. With their consent discussion of the demand was temporarily abandoned, to permit district presidents to consult their men before deciding whether it should continue an issue in the negotiations toward settlement of the strike.

Only three of the 19 provisions which the strikers have insisted their next contract must contain, have been taken up by operators. With none of these points settled and 12 more to be considered, both sides predicted that several weeks will lapse before a foundation will be laid for a new contract and work begun in the anthracite regions.

War on Border Smugglers

U.S. Will Fight Rum Runners at Canadian Border With Machine Guns.

Albany, N.Y.—Adjutant-General Kinchall has made public a telegram from Roy A. Haynes, Federal Prohibition Commissioner, in which Mr. Haynes was quoted as endorsing the Adjutant-General's plan to co-operate with Ralph A. Day, Federal Prohibition Director for the State, in an intensive campaign against rum smugglers along the Canadian border. Employment of machine guns and armored motor cars to be furnished by the Adjutant-General, was contemplated in the campaign to stop the illicit traffic, according to the announcement of the plan in New York.

Farmers Will Contest Seats

Decide to Place Candidates in Three Manitoba Constituencies.
Brandon, Man.—At meetings of representatives of the various farmers' localities in the constituencies of Lansdowne, Glenelg and Virden, respectively, it was decided to place a candidate to represent each of these constituencies in the coming provincial elections. A committee was appointed to make arrangements to look after organization arrangements.

Surplus on Canadian Lines

Ottawa.—Operations on the Canadian lines of the Grand Trunk Railway have saved the whole system from an operation deficit, according to detail statistics. On the Western lines the operation deficit was \$147,925.11; on the New England lines, \$681,490.29; and on the Central Vermont \$176,586.42. But, on the Canadian lines there was an operation surplus, namely, a surplus of operating revenue over operating expenses of \$5,675,739.47, making an operating surplus for the whole Grand Trunk system of \$4,372,517.

War Memorial for Moore Jaw

Moore Jaw.—Residents of Moore Jaw, at a special meeting called by Mayor Dunn, decided upon the erection of a temporary war memorial in this city. A committee, composed of Mayor Dunn, Col. Norman Greene, Mrs. W. H. Greene, J. R. Greene, chairman of parks board, and three others to be chosen later, was nominated by the meeting to proceed immediately to draft details for erection of the memorial.

Spanish Miners Strike

Madrid.—The miners in the province of Biscaya have gone on strike. Biscaya, the northwestern end of the Basque provinces, borders on the Bay of Biscaya. It is rich in iron ore.

Truce Is Declared Between Factions Along The Fermanagh Border

Belfast.—A truce was declared between the Ulster special constables and the Free State troops which have been menacing proximity along the Fermanagh border between Ulster and South Ireland, it is announced here.

Sir Basil Brooke, commanding the Fermanagh special constables, crossed into Free State territory at Blacklion near Belleco, and conferred with the rival leader.

The interview was harmonious and an agreement was reached under which both sides were to withdraw their forces a short distance from the border line to avoid the risk of a clash.

Each commander agreed to punish infractions of the pact.

The son of a farmer named Kelly, living at Listerick, Armagh, while going to fetch medicine for his mother, was overtaken on the road by a motor car. Kelly failed to satisfactorily answer questions put to him by the occupants of the car, who took him into the machine and drove away. Afterwards the men blindfolded Kelly, placed him in a ditch and fired a volley at him. Kelly, which both sides were to withdraw their forces a short distance from the border line to avoid the risk of a clash.

Debts & Debtors

If we give a merchant our custom, we have a right to expect him to advertise—to tell us weekly in the columns of "The Star" what he has for us. Advertising is shop news, designed to inform us, save our time, and bring to our attention desirable merchandise.

Every retailer who is alive to the interests of his customers has a message—often many messages—for his customers concerning new goods, special offerings, and things that we ought to know about. Customers and non-customers will be attentive and responsive to these messages, if they are delivered every week in the form of advertisements in "The Star." The way to get more business is to ask for it.

A NOTE TO MERCHANTS

Would YOU buy much or regularly from firms that never solicit your trade? Do you not say—"The firm that wants my business must come after it?"

Yet some of you say, in effect, to your customers—"We're here. If you want our goods, come and get them, but don't expect doesn't work both ways. It's a poor rule that us to go after you."

MORTGAGE SALE OF FARM PROPERTY

Near Wainwright
Pursuant to the Judgment and Final Order for Sale, there will be offered for sale subject to the conditions and reservations expressed in the Original Grant from the Crown or in the existing Certificate of Title, and excepting mines and minerals, with the approval of a Judge of the District Court of the District of Edmonton, by STEPHEN R. BOWERMAN, Auctioneer at the Town Hall, Wainwright, in the Province of Alberta, on **SATURDAY, the 29th day of APRIL, A.D. 1922, at the hour of 2.30 o'clock in the afternoon.** The South-West quarter (34) of Section Twenty (20) in Township forty-three (43) in Range six (6) West of the Fourth Meridian, containing by admeasurement 360 acres more or less, and recerving thereon all mines and minerals.

The Vendors are informed that the property is situated about seven miles from the town of Wainwright, and about three miles from Ascut school. About 60 acres of the lands are fenced; about 20 acres are broken and were in crop last year. About 25 or 30 acres more could be profitably broken; the rest is fit for pasture. The soil is sandy with sand subsoil. One storey frame dwelling, 14x24 and frame barn with board roof 20x32 are situated on the premises.

The sale is subject to a reserve bid fixed by the Judge. Terms of Sale—Ten per cent of the purchase price within 60 days without interest, or in the alternative a mortgage for \$450.00 for 3 years at 10% and the balance of the purchase price to be paid into Court within 60 days without interest; and upon payment of the said balance or upon execution of the said mortgage and payment of the balance as aforesaid the purchaser shall be entitled to a vesting order and to be let into possession at his own expense.

In other respects the terms and conditions of sale will be the standing conditions of sale of the Supreme Court as approved by the Master in Chambers.

For further particulars, apply to the Auctioneer, or to **HUMPHRY P. MAY** Wainwright, Alberta. Solicitor for the Vendor. Dated at Wainwright this 27th day of March, A.D. 1922.

R. P. WALLACE
Clerk of the Court.
Approved: H.C.T. J.D.C. 26-4

Canada's fur trade is one of her valuable "natural resources," and constantly expanding in value. Over \$20,000,000 worth of pelts (3,000,000) were taken during 1919-20, and successful fur markets have been held at Winnipeg and Montreal, the latter realizing over \$1,000,000 in September, 1921.

The things that man intends to do when he gets the time ever helps him up the ladder of success.

PUBLIC NOTICE

TOWN OF WAINWRIGHT NOTICE TO DOG OWNERS

Public Notice is hereby given that all Owners or Harbors of Dogs or Bitches are required on or before the 1st day of May, A.D. 1922, to procure from the Secretary-Treasurer at his Office in the Town Hall, a Tag with the License number stamped thereon which shall be attached to a Collar worn by the Dog or Bitch so licensed.

Persons neglecting to comply with the above Notice, are liable under a summary conviction to a Fine, and in default of paying the License Fee required, an order may be given for the destruction of such animals mentioned.

By Order of Council
H. Y. PAWLING
Secy-Treas.

TRIBUTE TO CANADIAN BACON

Mr. George Siggs, a leading English bacon merchant, handling large quantities yearly of Danish, Irish and Canadian product, pays a business man's high tribute to the preparation of Canadian bacon for the British market. It was in the course of a comment to a news correspondent on the paragraph in an Ontario newspaper attributed to an unnamed English merchant that the lower price paid for Canadian bacon was due to poor selection and curing and not to the wrong type of hog.

Mr. Siggs emphatically stated that this idea was inaccurate. "Canadian" packers select and cure their bacon excellently, I find," he said, "and it generally arrives in fine condition. The handicap is that the sides lack uniformity compared with the quality and weight possessed by the Danish. This is due to a lack of uniformity in the type of hogs produced in Canada. When Canadian farmers breed hogs which make long sides more like the Danish the only differential in price between the Danish and Canadian bacon will be due to the fact that the Canadian must be boraed to travel the long distance. Otherwise they could sell on a par."

He considered that the worst possible thing for the trade would be for the Canadian government to adopt an official system of grading bacon for export. "English buyers demand," he added, "the right to hold sellers responsible for the standard of the selection and the cure. This is the genius and spirit of business."

Canada's vital statistics for 1920 were: 247,219; marriages, 80,472; deaths, 73,563. Percentages per 1,000: Birth rate, 27.47; marriage rate, 8.94; death rate, 8.17. Quebec had the highest birth rate in 35.76. New Brunswick coming second. Ontario had highest marriage rate. New Brunswick and Nova Scotia highest death rates. British Columbia has lowest birth rate. Death rates of B. C. and prairie provinces much lower than eastern provinces.

SCHOOL CRITICISM

Convention week for the school teachers is a time of mental relaxation and mental readjustment. In all classes of work it is easy to get into a rut. That is particularly true of teaching with its daily round of routine and it should be the constant aim of teachers to avoid that deadening groove. The holding of their annual convention is one method adopted to refresh their knowledge of methods and to renew early enthusiasms.

The public school as organized in this province and practically every other also, will come in for its share of criticism this week. Teachers will be told that a child should not be put to its books before it is eight years old. The charge that the schools are laying too much emphasis upon non-essentials and not enough upon reading writing and arithmetic will be heard again. There is always some dissatisfaction with the school system, from within the education organization as well as from outside, and this perhaps, is not to be deplored.

Practical souls are continually berating educators for failure to send the child out into the world with a good working knowledge of simple business methods. They forget—if they ever knew—that the schools as now conducted are a remedy for the deficiencies of the three-R's of education, and that the remedy was applied under strong pressure from the public. The implication of their censure is that the remedy is worse than the evil, but the champions of the remedy have an exhibit of imposing prestige. They have a competent generation so educated to support their case, and they are supported by many persons who are willing to let well enough alone.

SEASONABLE ADVICE

No investment adds so much to the value of your property as a coat of paint. This adds years to the life of the lumber. It will give the owner pleasure and satisfaction every time he looks at his buildings. It increases a citizen's credit and prestige by adding value to his land as well as to his buildings.

A small cheaply-constructed building, when well painted looks comfortable and cozy, while others, sadly lacking this necessary protection from the elements, no matter how pretentious and elaborate in their plans, are little better than an eyesore within a short time to one of aesthetic tastes, besides the fact that the depreciation upon such property is truly marvellously wasteful.

Paint is cheaper today than for a number of years, and our town dealers are always ready to figure out the amount necessary for a job, and to advise as to combinations of colors, etc.

With our buildings freshened by this means, the whole community gains a wonderful asset, too, in its greater appeal to the stranger within our gates, and thus increases its stability as a progressive western town.

The past week has seen quite an epidemic of "Rubbish bonfires" and with a little foresight as to future values, and the necessary energy to accomplish, Wainwright can be made to stand, out as the one town on the G. T. P., where peace, progress and prosperity go hand in hand with cleanliness, color and conservation.

NO WHEAT BOARD

A brief dispatch from Ottawa states that the law officers of the crown have found that re-establishment of the wheat boards, with the same compulsory powers as the old wheat board does not lie within the powers of parliament.

It will be necessary to wait for full details of the questions put to the law officers before the meaning of that answer can be judged with certainty.

Mr. Crerar stated in the House during the discussion of this matter that a Wheat Board without compulsory powers would not be satisfactory. The memorandum of the council of agriculture which gave rise to the question in Parliament asks specifically for one thing and for that only, namely, the re-establishment of the Canada Wheat Board with all the powers it had in 1919.

It being the opinion of the law officers of parliament that parliament has not the power to grant that request, that ends the matter, so far as that type of board is concerned.

The farmers of the West will be disappointed. The government will probably not regret being relieved of a heavy responsibility. Mr. Crerar has won his fight against the re-establishment of the Wheat Board.

DO NOT TRY TO VENER, POLISH OR COVER UP YOUR FAULTS.

The ague doesn't leave a man when it gives him the shake

NEW GUIDE

TO ALBERTA NOW
LISTS 2136 PLACES

Wrigley's Alberta Directory for 1922 has been issued, and forms an excellent book of reference of the Province.

The directory proper covers 2136 cities, towns, villages and settlements—treated alphabetically, with a description giving location in section, township, range, Federal and Provincial Electoral districts, Land and Judicial Districts, also Municipality Number, population, railroad or nearest station express, telephone, telegraph and banking point, value of lands, crop averages, etc.

The classified business directory indexes the business interests of the Province under some 600 headings, and is excellent for quick reference.

In addition to these main sections, there is an introductory having to do with the early history, resources and development of Alberta. Among the wide variety of subjects treated, are included area and surface, agricultural resources, with statistical tables and articles on mixed farming, dry farming, irrigation, crops, live stock, dairying, wool production, co-operative organizations, minerals, timber, game and fisheries, education, schools, university, highways, bridges, ferries, the scope of the municipal and industrial development, and also transportation facilities are fully discussed. Half-tones and charts are used to illustrate this excellent and comprehensive treatise.

Follows an outline of the government of the Province, and its judiciary. Government departments and officials are listed, indexing the scope and personnel of all departments.

Gleaned from the directory are the following interesting figures.

Alberta is 250 miles long by 200 to 450 wide.

Alberta has an area of 255,585 square miles, equal to Montana, North Dakota and Minnesota.

Twice area of Great Britain and Ireland.

Alberta has 86,084 farms under cultivation.

Alberta produced in 1921, wheat 59,047,700 bushels; oats, 92,156,655 bushels; barley, 12,642,249 bushels; flax, 136,483 bushels; rye, 3,198,758 bushels.

In 1920, butter 11,821,29 lbs.; cheese 398,750 lbs.

Alberta has produced a yield of 54,330 bushels of wheat from one 1000-acre tract, while in the Peace River district in 1921, 260,000 acres sown yield 6,682,500 bushels.

Alberta oats have yielded 136 bushels per acre, and is one competition the best samples exceeded 50 lbs per bushel.

Alberta has one million acres of irrigable land.

Alberta has one ranch of 1000 pure bred Percheron horses.

Alberta has more sheep than the other three western Provinces combined.

Alberta has 423,838 dairy cows, 523,599 sheep, 70,000 flocks of poultry.

Alberta creamery butter in 1921 at eleven largest exhibitions secured half the awards, 157 out of 324 prizes; of 1861 points Alberta secured 965 or 51.8%.

In the 1920 All-Canada competition Alberta secured first, second and third prizes.

Alberta has population of \$381,995, an increase in ten years of 53.34% while Northern Alberta, 200 miles north of Edmonton, has 60,000 population.

Alberta has 4,357,000 acres of park reservations.

Alberta has 5,416,000 acres of timber or 21 billion board feet of merchantable lumber.

Alberta has the largest coal area in Canada, 1,059,975 million tons, in 1920 produced 6,909,923 tons.

Alberta's fur business, two or three million dollars yearly.

Alberta's University has over 1200 students.

Alberta has 42,850 telephone subscribers, including 14,000 farmers.

Alberta land values average per acre, improved \$55 (in U.S. \$94.27); unimproved \$27 (in U.S. \$69.90).

This is the second directory of Alberta, and is produced along similar lines to the British Columbia and Saskatchewan directories published by Wrigley Directories Ltd.

Technical education means the state and acquisition of a trade. Technical schools are now part of the Canadian school system, with an enrolment, as on June 30, 1920, of 60,000 pupils.

A windmill which has been in the possession of one family for well over a century still stands in Brixton, London.

Entirely New Treatment

For Bronchitis, Catarrh,
No Internal Medicine to Take

Years ago the profession fought Catarrh by internal dosing. This upset the stomach and didn't remove the trouble. The modern treatment consists of breathing the healing, soothing essence of Catarrhose, which goes instantly to the source and the trouble. Catarrhose is successful because it penetrates where liquid medicines can't go. The balsamic vapor of Catarrhose drives out the germs, soothes the irritation, relieves the cough, makes Catarrhal troubles disappear quickly. For bad throat, cough, bronchitis, Catarrhose is a wonder. Two months treatment one dollar. Small size 50c. Sold everywhere or The Catarrhose Co., Montreal.

Vertical Flight
Problem Solved

Test of Handley-Page Slot Wing Proves Successful

The latest tests with the now famous Handley-Page high lift slot wing show that the future of vertical and horizontal flight is solved by aircraft fitted with such high lift wings rather than by the helicopter system.

The Handley-Page slot wing, carrying an aeroplane, the first machine fully equipped with the variable slot type of wing, has undergone further test flights.

As soon as the engine was "opened up" the biplane jumped straight into the air with practically no preliminary run.

When the slots were closed it showed a very high speed; when they were opened again the machine slowed down to practically nil and descended vertically on an even keel for more than a thousand feet, in a space about as big as a tennis court.

What is more important still, it could have flown away again from the same landing space.

The action of this opening and closing wing is similar to the action of a bird's wing when it opens and closes the main feathers for slow landing on a telegraph wire, and when flying from a confined space.

It was invented by Handley-Page in March, 1920, since when Handley-Page's have been carrying out exhaustive tests.

The latest machine is nicknamed "The Hilda," owing to its being said to have 17 different varieties of control.

The machine proves that this wing is a definite revolution that is going to make aviation a wonderful commercial proposition.

Removing Dirt From Wheat

Machine Will Clean Wheat at Time of Threshing

One source of economic waste has been the contamination of wheat by dirt and the seeds of various weeds and foreign grain, such as wild oats, buckwheat and many others. Lately a machine, which is illustrated and described in the May Popular Mechanics Magazine, has been developed and tested which seems to point to the solution of the problem of cleaning wheat at the time of threshing. It is of simple construction and can be placed on the top of the threshing machine, receiving its power from that source.

Stand-Patters
Every day people who never were prohibitionists break into print to inform the world that they do not believe in prohibition. Well, they are not expected to.—Edmonton Bulletin.

Could Not Eat

Constipation is caused by a torpid condition of the liver. Dosing with salts, castor oil, etc., to move the bowels, cannot afford more than temporary relief.

If you are to rid yourself of this ailment and the scores of annoying symptoms and diseases which come in its wake, it is necessary to get the liver right by such treatment as is suggested in this letter:

Mrs. Alvin Richards, R. R. No. 1, Secley's Bay, Ont., writes: "For two years I was afflicted with indigestion, and in the morning when I got up my breath was bad. I had no more appetite, and just felt like eating certain foods. I used many different medicines as a laxative without benefit, and the doctor's medicine did not help me at all. Finally I tried Dr. Chase's Kidney-Liver Pills, and found them better than anything I had ever tried. I can highly recommend them to anyone troubled with constipation or kidney trouble."

Dr. Chase's Kidney-Liver Pills, one pill at a dose, 25c a box, all dealers, or Edmondson, Bates & Co., Ltd., Toronto.

Movement Towards Canada

Nebraska Farmers Interested in Farm Land in Canadian West
(Special Correspondence by G. C. Porter, of Winnipeg)

Omaha.—During the past twenty years this section has been a most prolific recruiting ground for emigrants from the rural districts, who desired to move into the Canadian Northwest. More purchasers of land than homesteaders have been contributed by Nebraska to the Canadian prairies, but many homesteaders also have gone from here.

W. V. Bennett, Dominion Immigration Agent at this point, is daily in receipt of personal calls and letters of enquiries from all over the State from those who are going or contemplating going to the Canadian Northwest.

Homesteading is not very popular with Nebraska emigrants except with the younger sons of the farmers who were themselves homesteaders in Western Nebraska. The agents supply these people with railroad maps and valuable advertising matter prepared by the Government.

Many Canadian and American soldiers who served overseas are anxious to obtain land on the Prairie Provinces. Many of these boys are back-landers and want homesteads. They have some money and a few of them they have had experience as farmers they are promptly taken in hand and given every encouragement. If they are mechanics and want to go to the different cities they are acquainted at once with the conditions prevailing in their particular trades.

Dr. A. H. Hipple is chairman of the citizens committee which is arranging to have J. Bruce Walker, commissioner of Dominion Publicity, deliver addresses here before the Chamber of Commerce, the Kiwanis and Rotary Clubs. Dr. Hipple spoke enthusiastically of the movement towards the Canadian Northwest. Prominent business men are helping the movement which they say they expect to see toward Canada and the Central States this spring.

Peace Depends on
Working Together

Everyone Has Individual Responsibility Says Sir Auckland Geddes

Sir Auckland Geddes, British ambassador to the United States, recently addressed before seven and eight hundred men and women representing both Canadian clubs at the Royal Alexandra Hotel, Winnipeg. "Canada and the United States have never before been on such good terms as they are today," he said, "and now every thinking man wants to see such a demonstration of the determination to work together for the good of the world as will impress all people everywhere."

Peace was a mental state, Sir Auckland said, and was often contrasted with war as a sort of negative to it. Peace was something positive. Peace was a joyful acceptance of the reign of law and justice between nations. What the world was suffering from at the present time was a mental condition. Men's minds were not yet ready to accept the reign of law.

"Now, you men and women are just as capable as anyone else to help produce that state—that mental state called peace—in as many minds as you can reach," Sir Auckland said. "We have all got to work and will for that state of mind. Each of you has today an individual responsibility, no less real in kind than that which rested upon you in 1914."

Officials in Germany

State Has Over Half Million Men on Payroll

Remarkable figures disclosing the enormous proportions to which officialdom in Germany has grown since the war, and the staggering burden thus added to the treasury debt, are published by the minister of finance. The state itself, exclusive of the army officials employed in the various states and municipalities, has on its payroll more than half a million men, who cost Germany yearly \$4,000,000,000 paper marks (about \$40,000,000) and a proposed increase of wages will bring the total to at least \$300,000,000.

The Germany economy axe has been blunted, and new legislation is providing employment for still more officials. About one German adult in every three draws Government pay.

Goat Industry Increasing

The annual value of goat products in British Columbia exceeds that of sheep, and goat raising is now regarded as an important industry of the province. The milk yield during the past year increased forty per cent. over 1920, and still the supply is inadequate to meet the steady demand for this product.

Conan Doyle Will Raid "Septicemia" Sir Arthur Conan Doyle, creator of Sherlock Holmes, but now a sincere believer in things spiritual, arrived in New York recently to raise America's prayer to make a raid on America's "septicemia," he said, in explaining the purpose of his proposed lecture tour. "I propose to raid church and laity alike."

Ships With Wings
Destroyers and warships are being made by a British firm under direction of the air ministry. The winged ships are made for navigation on the sea as well as through the air.

Tokio's Railway Problem

Carry Million Passengers Daily on 181 Miles of Line

Whilst the Japanese Government Railways carry 1,300,000 passengers daily on their system which comprises 6,000 miles of railway, the Tokyo street cars carry the same number of persons per day on only 181 miles of line. To do this 1,300 cars are in continual use, and it is estimated that 160,000 miles are traversed by them every day—a distance of more than six times round the earth. It will readily be understood that the overcrowding in cars is a serious matter, and improvements are continually being adopted, the construction of underground railways being now under consideration.

Have You Ever Seen a Basilisk?

HERE is not very much that is particularly attractive about the Basilisk other than the general interest that exists in every living and breathing being. Just like others of greater or lesser degree the little Basilisk is filled to itself at least with round of days and nights of absorbing interest. It sleeps, it eats, and this, by the way, is a constantly enjoyable and engrossing business; for the little fellow has to hunt, chase and kill its own food. Also, as every earthly creature has a certain duty to perform, so has the Basilisk. Its duty is to eat, and to make matters worse, the Basilisk was coming straight toward him, with its mouth wide open.

"It could easily swallow a dozen such as I!" he thought, and his heart throbbed so hard against his ribs that he was sure it must echo through the hills. "Oh, help!"

Imagine his amazement when the Basilisk passed him without as much as a glance of notice, and a little distance further on caught a large winged insect in its jaws, which it swallowed with a grin of delight! "Then it bore down on a big spider; a Caterpillar went next, and Pimble in the course of a short while counted at least sixteen victims to the Basilisk's appetite. Evidently I'm not considered good to eat," thought Pimble, "but perhaps I might be more appreciated to talk with. Let me see." So, wriggling down the branch in the direction of this odd animal, he approached it with a question.

"Which tasted the best?" he timidly asked.

"It was a lucky subject, for it was one particularly appealing to the Basilisk."

"The Caterpillar, of course," it answered. "I always like them better than insects, because they are soft and fat and have no hard shell to scratch my throat. I never eat anything that I don't know all about. Who are you?"

"Pimble was just about to tell him when he thought that after the remark about never eating strange things perhaps he had better answer. "Oh, I'm a stranger from the End-of-the-Earth."

Copyright, 1922

that I was too busy watching you." You are a wonderful hunter," the Basilisk said. This pleased Pimble as he was a wonderful hunter, and Pimble learned all about everything connected with its life and family, and the two then and there became quite friendly.

There is also a Basilisk that lives near the water, and, dropping in, it swims away from danger. Its eggs are left for the sun to hatch and, like its helmeted cousin, it also lives on insects and fruit.

Business Brothers

President Nelson, of Smith College, was making a rather tedious journey and was glad when the man who had the seat in front of his turned around and began a conversation. The man proved to be a traveling salesman and took it for granted that Dr. Nelson was another "What's your line?" he asked. "Mine's skirts," "Well, so is mine," said the president of Smith.—New York Evening Post.

YOUNG WOMEN
WHO SUFFER

Letter Points Way Towards Relief—Lydia E. Pinkham's Vegetable Compound

Toronto, Ontario.—"I suffered from the time I was a school-girl until I had taken your medicine with pain in my left side and with cramps, growing worse each year until I was all run down. I was so bad that I was unable to work. I tried several doctors and had many medicines and was only relieved for a short time. I am now a well woman and feel as if I have saved my life. You may use my letter to help other women as I am glad to recommend the medicine."—Mrs. H. A. Gossiaux, 14 Rockvale Ave., Toronto, Ontario.

Lydia E. Pinkham's Private Testimonial upon "Aliments Peculiar to Women" will be sent you free upon request. Write to "The Lydia E. Pinkham Medicine Co., Lynn, Mass." This book contains valuable information.

ACHES AND PAINS—
SLOAN'S GETS 'EM!

Avoid the misery of aching pain. A bottle of Sloan's Liniment handy and apply when you first feel the ache or pain. It quickly eases the pain and sends a feeling of warmth through the system without rubbing.

Fine, too, for rheumatism, neuralgia, sciatica, sprains and strains, stiff joints, lame back and sore muscles.

For forty years pain's enemy. Ask your neighbor.

At all druggists—35c, 70c, \$1.40.

Saskatchewan Schools

More Schools Being Operated This Year than in 1921

General economic conditions notwithstanding, more schools are being kept in operation this spring than at the same time last year, judging from figures for February in the possession of the Saskatchewan Department of Education.

Referring to statements that schools are being kept closed on account of financial conditions, A. H. Ball, deputy minister of education, said it was the expectation in the department that returns would show a considerable falling off in the number of schools in operation in the province.

On the other hand, said Mr. Ball, "a report supplied to the minister for February shows that 2,592 schools were in operation that month as compared with 2,575 at the end of February, 1921. It is quite evident that a very earnest effort is being made by boards of trustees throughout the province to maintain schools in operation notwithstanding adverse financial conditions."

Recognized

They sat looking at her engagement ring.

"Did your friends admire it?" he inquired.

"They did more than that," she replied. "Three of them recognized it."

Toilers Save Penny a Day
The Great Western Railway of England has asked its 90,000 employees to save one penny per day per man. General compliance with the request would mean an aggregate saving of nearly \$700,000 a year.

No soldier in Great Britain will be eligible in future for married quarters unless he is 26 years of age.

Every Fourth Man Has War Claim

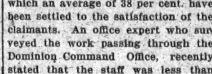

Over 21,000 Claims Submitted to the Dominion G.W.V.A.

The flood of claims for adjustment of matters arising from war service which continues to pour into the headquarters of the Dominion Command, G.W.V.A. at Ottawa, has brought to light the remarkable fact that every fourth man enlisted for overseas service during the Great War considered that his balance with one branch of the service or the other had not been properly squared away when he was demobilized. Since the formation of the G.W.V.A. more than 215,000 claims have been submitted through its adjustment services. An average of 35 per cent. of these have been satisfactorily settled. The "Clean Sweep" Campaign undertaken by the association last fall, and which still continues with undiminished energy, has thus far been responsible for the submission of over 21,000 claims, of which an average of 35 per cent. have been settled to the satisfaction of the claimants. An office expert who supervised the work passing through the Dominion Command Office, recently stated that the staff was less than half that which would be required if the same volume of work was to be undertaken by a well organized government department. He congratulated the Dominion officials upon the smooth operation of the adjustment service, which involves hundreds of personal interviews and telephone calls, beside a tremendous volume of correspondence. More than 80 per cent. of the war service claims received by government departments dealing with such matters have been settled by the G.W.V.A. Less than five per cent. have been submitted by other veteran organizations.

Alberta Co-operative Potato Growers

Six New Potato Associations are Being Organized

W. F. Broadbent, secretary of the Edmonton Co-operative Potato Growers' Association reports that there will be at least six potato growers' associations organized in the province during the coming summer. Potato growers at Veterans, Lethbridge, and other points have already indicated their intention of organizing local associations and will affiliate with the Edmonton organization.

These local organizations will sell their potatoes through the Edmonton potato growers' association and for each share held by a local grower according to the amount of potatoes that they produce. A fee of \$25 will be charged for every five cars sold. This is the amount of one share in the Edmonton association, and for each share held by a local grower will have one vote.—Edmonton Bulletin.

Harsh But Necessary
Revoluting as it seems for armies to drop bombs on their own people, they have no choice but to fight when revolution boils up. What kings have done in defence of their thrones and Bolshevik rulers have done in defence of their power, a liberal government like that of South Africa must also do when challenged.

General Smuts, who has little faith in the ultimate solution of social troubles through force, may be relied upon when possible to use intelligence in place of bullets.—New York Sun.

Western Provinces Offer As Good Opportunities as the East for this Industry

Dr. W. G. Church, Dominion Inspector of Silver Black Foxes for Live-stock Branch, Department of Agriculture, Ottawa, Ont., says:

After having personally visited the different provinces of Canada, and studying the situation from every angle, I am convinced that there are wonderful opportunities for this industry in the western provinces. When I say wonderful, I will quote what has been done by one of the eastern provinces, and in a future article will explain why the west has a chance of doing equally as good, if not better work than the east has done.

Everyone recognizes the fact that Prince Edward Island is an agricultural country. They also know that she is an island, and therefore rich in fisheries, and this island is often referred to as the garden of the gulf, and everyone who has visited this island has been willing to concede that this is the proper title, and that it certainly is a garden, and when they investigate the fishing industry, they are also ready to concede that it is also a great source of revenue. For there on the shores of this island are caught the most delicious system which commands the highest market price, as also lobsters, clams and many varieties of deep water fish, such as mackerel, cod, salmon and halibut that went to swell the revenue from this industry.

Then combining the revenue from both the fisheries and agricultural products, the revenue from the fox ranching industry of Prince Edward Island was as great as the others combined.

Just stop and think of this. I am going to write a series of articles dealing with this industry, and will gladly furnish free of charge any information relating in any way to the fur industry.

Further wishing such information as to write me, and enclose a self addressed, stamped envelope for reply.—Dr. W. G. Church, Summerside, P. E. I.

The checks which pass through the clearing house in London and New York in one month, in normal times, are said to exceed the value of all the existing gold and silver coin in the world.

The aborigines inhabiting the Malabar Islands speak to each other at a distance by whistling, the whistles being selected for their ability to imitate human speech. They make this their livelihood.

Migration of U.S. Farmers

Expectation of Canadian Officials Causes Anxiety in Washington

Reports have reached Washington that Canadian officials expect a heavy migration of farmers from the United States into Canada because of the depressed condition of agriculture in the United States. These reports are viewed with apprehension by the members forming the agricultural bloc in Congress. They have for some time foreseen the likelihood of such a movement, one of these members declared, especially among tenant farmers and farmers who have been caught by the deflation of prices and had their mortgages foreclosed. The bloc will urge Congress to pass liberal credit legislation and other legislation to relieve agricultural conditions in order to prevent the United States losing to Canada many of its best practical farmers.

Partridges for Saskatchewan
Saskatchewan game wardens are making an attempt to establish a partridge colony in the Cypress Hills district in the southwestern part of the province. The territory mentioned is well suited for the birds, but for some reason or other has never been inhabited by them. Families of the birds are being now placed in the preserve.

According to scientists sounds are diverted and lessened during rain. That is because the falling rain "twists" the sound waves from their course.

EDWIN W. FIELD

"I'm convinced if I had taken Tanlac two years ago, when my troubles first began, I would have been saved a world of suffering," said Ed W. Field, 538 Jefferson St., Milwaukee, Wis.

"My case proved that when a man's stomach goes wrong, everything goes wrong with him. The first thing I noticed out of the way was loss of appetite and next, that no matter how sparingly I ate, I was sure to get an attack of indigestion. I finally got so I couldn't walk a couple of blocks without having to stop and rest and I was so nervous that often I sat up in a chair all night long.

"Tanlac has made a new man out of me. My stomach is as sound as a dollar and I feel fine all the time. I am a firm believer in Tanlac because I know it delivers the goods."

Tanlac is sold by all good druggists.

France Will Test

Motorless Aircraft

Trials Expected to Take Place During the Summer

Trials of motorless airplanes are to take place on an extensive scale in the Department of Aeronautics, in Central France during the summer. Efforts in the direction of developing some kind of airplanes capable of flying without the aid of motors were generally regarded as having been left to Germany, but the French have now entered the field on a large scale.

The municipal council of Ayrat, near the well-known lake of that name, has just authorized the Aeronautics Club to operate in the parish an aerodrome for the use of the body formerly known as the Experimental Congress of Motorless Airplanes, which is to be held there from July 15 to September 15. The hangars will be erected at the foot of the peak called the Puy-de-Pennegasse. The motorless airplanes will "take off" from the top of the peak.

Too Much Unrest

Many Causes Advanced for Present Restlessness in World

Opinions as to the cause of "unrest" so much in evidence vary quite as much as the numerous forms in which the unrest is manifest. Some of the causes advanced are too much jazz, too much hooch, too much lawlessness, too much law, too much restraint on the people, too little restraint, too little religion, too much preaching, too much unemployment, too much hatred, and so on. It seems to be either too much or too little of one thing or another. The only thing on which nearly everybody seems to agree is that there is too much unrest.—Springfield Union.

Badger, symbolical of their name, are being supplied to many ships of the British navy.

Eager to Get Facts

American Agriculturists Want to Know More About Farming Conditions in Canada

(Special Correspondence by G. C. Porter, of Winnipeg)

Pargo, N.D.—In point of territory covered this is the most important immigration outpost maintained by the Dominion Government in the United States. Through this gateway streams of emigrants from Kansas, Missouri, Arkansas, Oklahoma, Texas, Mississippi and Louisiana into the Canadian Northwest. F. H. Hewitt is the agent in charge for the Government here and at present his mail brings thirty-five letters daily enquiring about the prospects for farm, fruit and dairying prospects on the prairies and in British Columbia.

During the past three weeks I have received what is said to be the knife of the gullotine used in Paris during the French Revolution and the subsequent Reign of Terror and which served to decapitate Louis XVI, Marie Antoinette, Robespierre, and thousands of others. It was a gift to the museum from a Belgian collector. The relic is said to have been in the possession of the family of Simon, the French executioner of the French Revolution, for several generations.

I attended a Farmers' Institute at Colby, Kan., recently. This is the extreme western part of the State. These "institutes" are informal gatherings of farmers where reports are read from Agricultural Societies. Through Agent Hewitt, carrying his exhibits to many country fairs in Kansas, the farmers have a very accurate knowledge of the conditions on the Canadian prairies. These people are eager to get facts. They are familiar with scientific soil culture. To tell one of these men that a given farm produced so many bushels to the acre is to invite such a multitude of questions that only a soil expert could answer. Jacob Mohler, Secretary of Agriculture for Kansas, says that for the first part of April his office has a considerable number of prospects for the Canadian Northwest who will go up to "spy out the land." Most of these agents would rather have a "prospect" make a trip over the line before he tries to decide on location or details of any kind. Mr. Mohler, talking to me, remarked, "I have known of many men who went to Canada and prospered and then I have heard of some who came back dissatisfied." It is to avoid these dissatisfied ones that agents are now working.

A Fee for Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatment and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the innermost breathing passages and leaves no place for the trouble to turn. Have it by you for ready use.

A "Play" on Words

Shopkeeper Proved Himself Too Smart for Conceited Visitor

Struck by the notice "Iron Sinks," in a shop window a conceited fellow went inside and asked the owner, "Is this perfectly aware of the fact that 'iron sinks'?"

Alive to the occasion the smart shopkeeper retorted: "Yes, and time flies, but wine vaults, sulphur springs, jelly rolls, goose salad, music stands, Niagara Falls, moonlight walks, ship-runs, Kent hops and holiday trips, bed-spreads, standard weights, India rubber tires, organ stops, oil paints, community signs, trade returns, and—"

But the visitor had bolted. After collecting his thoughts he returned and showing his head at the doorway shouted: "Yes, I know, and steeple chases and marble busts."

Whistling Tree

The "Whistling" or whistling tree of South Nubia, is so called from the flute-like sounds made by the wind in its branches. The sound is caused by the holes bored by an insect in two spaces of the branches.

The man who slowly climbs the ladder of success reaches there longer than the one who reaches it by the balloon route.

The Wonderful cerebral balm for injuries & skin disease. 40c. all dealers.

Historic Knife

The Charnval Museum recently received what is said to be the knife of the gullotine used in Paris during the French Revolution and the subsequent Reign of Terror and which served to decapitate Louis XVI, Marie Antoinette, Robespierre, and thousands of others. It was a gift to the museum from a Belgian collector. The relic is said to have been in the possession of the family of Simon, the French executioner of the French Revolution, for several generations.

BABY'S OWN TABLETS

ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are mild and thorough, laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fever and making teething easier. Concerning them, Mrs. Schulte Feltner, St. Dunas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers. My little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Exports of Wheat from Canada

The total exports of wheat from Canada for the six months ended February 28, 1932, were 103,727,336 bushels, as against 95,268,818 bushels for the same period last year. Of the total amount the United Kingdom took 75,682,563 bushels, while 19,257,765 bushels went to other countries and 9,432,571 to the United States. The largest movement for any one month during the above period was in the month of December when 34,432,223 bushels were shipped.

CATARRRH

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE, a blood purifier, treats it, and acts through the blood upon the internal organs, driving out the poison. CATARRH MEDICINE, a local Nature in all Druggists. Circular free. E. J. Conroy & Co., Toledo, Ohio.

Turkey has a government agricultural bank with a capital of nearly \$15,000,000.

The ease with which corn and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Claiming that music of all kinds is harmful to morality, the mayor of a certain town in France ordered the suppression of all phonographs and phonographs in his commune.

Rosin Has Become Valuable

New Uses Found for a Practically Waste Product

Many articles in daily use came originally from the ground but few realize that "mining" rosin has been a thriving industry in the United States for many years, despite the fact that rosin is the product of the sap of certain species of evergreen trees.

Half a century ago rosin was so cheap that it did not pay to put it in barrels and send it to market. The barrels were worth more than the rosin. Turpentine, however, brought a good price and came from the same sap which yielded rosin as a by-product. In consequence manufacturers concentrated on the turpentine and allowed the molten rosin to run into pits, where it hardened and was covered with earth to get it out of the way.

This went on for some twenty-five years, and meanwhile the value of rosin went up because new uses were found for it, principally in the soap and paper industries. For a time people forgot about the tons of valuable rosin lying buried on the site of the old turpentine distilleries, but by and by a group of enterprising manufacturers began to work these rosin "mines." Of course these buried supplies will never be used up, and then people will have to turn once more to reducing rosin from pine gum.

The drug contained in the mesal cactus button produces in the user feelings of gorgeousness.

Minard's Liniment for Burns, etc.

Speed of the Tortoise

Takes Nearly Four Years to Travel One Mile

A professor at Wisconsin University in America has been playing a joke with tortoises. He has discovered, by letting loose 156 tortoises all labelled, that a tortoise takes four years all but a few days to cover a distance of one mile.

The professor also noticed that in a period of five months the 156 tortoises went a distance of 115 yards, thus making their average speed about two feet in one day.

Travelling at that rate, a tortoise starting from London would take nearly a century to reach Edinburgh.

A STUDY OF OLD AGE

It is always interesting and reveals the fact that the blood is usually thin and lacking in the strengthening properties of young folks blood. If you want to fill your blood with the fire of youth, build up your strength, restore your nerves, just use Dr. Hamilton's Pills. This wonderful medicine is a great system restorer. Keeps the bowels in good condition, keeps the body free of waste and impurities. For 30 years the use of Dr. Hamilton's Pills is recommended, 25c at all dealers or The Catarhazone Co., Montreal.

Blocked Doorway at

Hampton Court Opened

Haunted Chamber Has Been Closed For 187 Years

After having been closed for 187 years, a blocked-up doorway at Hampton Court Palace has been reopened. It connects Henry VIII's so-called Watching Chamber and the well-known Haunted Gallery. Through it have passed Shakespeare, Charles I., Queen Elizabeth, Mary Queen of Scots, Oliver Cromwell, and a host of other historical personages. Catharine Howard, one of Henry VIII's consorts, passed through it on her way to the scaffold.

Shakespeare's company performed plays in the Great Hall of Hampton Court Palace at Christmas, 1605, and the rehearsal took place in the Watching Chamber.

A feature of the "Haunted Gallery" was a picture of the Wild Man and Woman, brought by Martin Probert from America which is supposed to have given Shakespeare his first conception of Caliban.

The doorway was closed by King George III. In 1735, who had the gallery turned into a habitable room.

For Years, Mother Graves' Worm

Exterminator Has Ranked as a Reliable

Worm Preparation and It Always Maintains Its Reputation

Happy Thought

The editor of the London Times alluded in a recent article to the distinction between "news" and "views." Some papers, he said, are newspapers; others tended to be newspapers. This gave us an idea. Why not call our bulletin, newspapers; footnotes, journals; shopkeepers' sales sheets, crowspeers; poetry, newspapers; journals; and home brew recipes, newspapers, and so on and so on. We really ought to patent this.—Boston Transcript.

Minard's Liniment Relieves Neuralgia

Motors in Canada

Motor vehicle registrations throughout Canada increased by 13 1/2 per cent. during 1931. The 1930 increase was 20 per cent.; that of the year previous 23 1/2 per cent., while in 1918 a 24 per cent. increase was made, and the year 1917 marked a gain of 61 per cent. over the year immediately preceding. There are now about 520,000 motor cars in use in the Dominion, or about one car to every seventeen of the population.

Self Preservation—Nature's

First Law—Heed It!

Preserve Your Strength

Tillsonburg, Ont.—"Ever since I can remember, Dr. Pierce's medicine has been used in our family at home and they never failed to give me relief. The 'Golden Medical Discovery' was used as a tonic and blood purifier also for bronchial trouble and it proved excellent. I myself have taken the 'Discovery' for bronchial trouble and Dr. Pierce's Favorite Prescription to build me up when I was run down, and they were both very beneficial.

"I feel safe in recommending all of Dr. Pierce's medicines knowing them to be good."—Mrs. Clifford Mitchell. Obtain these famous medicines now at your nearest drug store, or by mail, or send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., for a trial package of any of his remedies. Write Dr. Pierce, President, Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

How's Your Liver?

Health Is Kept, If You Observe This

Santalum, Sank—"I have taken Dr. Pierce's Golden Medical Discovery for liver trouble and found it a pleasant and would not be without it. I suffered from congestion of the liver about six years ago and I always knew that this medicine cured me. I have also given it to my family for colds and it cures them in a very short time."—Mrs. Enock Mitchell, Box 123.

SUNDAY SCHOOL LESSON

LESSON FOR APRIL 23

UZZIAH'S PRIDE AND PUNISHMENT

1. Uzziah Made King (vv. 1-5).

1. His Age (v. 1). He became king at the age of sixteen.

2. Length of His Reign (v. 3). He reigned fifty-two years. His mother's name was Jezebel, which means "Jehovah is able," or "Made strong of Jehovah."

3. His Character (v. 4). "He did that which was right in the sight of the Lord."

4. His Prosperity (v. 5). He definitely sought God while Zechariah lived, and because he sought him God made him to prosper as long as he continued to seek him. He like Joash before him, turned aside when the influence of the man of God was removed.

II. Uzziah's Achievement (vv. 6-15).

1. He Built Beth (v. 2). This was a part on the Red Sea which had been lost to Judah. No doubt it was the aim of the father to get possession of this port, as the son makes his restoration his first duty. It was an important trading point and the commercial interests of the nation would be greatly increased by its possession.

2. He Had Military Success (vv. 6-8). (1) He conquered the Philistines (v. 6). After subduing them he dismantled their fortified cities and built new cities in their stead. (2) He defeated the Arabians (v. 7). (3) He made the Ammonites across the Jordan pay tribute (v. 8).

3. He Fortified Jerusalem (v. 9).

15). He took advantage of the peace which was now enjoyed because of the subjugation of his enemies to fortify Jerusalem. He placed in the towers great engines of war for hurling stones.

4. His Civic Improvements (v. 10).

In the regions south and west of Jerusalem he built towers which served a twofold purpose, namely: Observation, defense and shelter for his capital. This enabled him to guard his stock-raising enterprises.

5. His Army (v. 11-15). It numbered 307,500. It was thoroughly equipped and drilled. God was with him, and his fame spread far and wide. The source of his strength was God.

III. Uzziah's Transgression (vv. 16-19).

The prosperity bestowed upon him by the Lord was too much for him; his heart was lifted up with pride. This is always so unless counteracted by discipline. He tried to arrogantly intrude into the priest's office. This act was not because of forgetfulness, but of deliberate purpose. Azariah and eighty other priests gazed at him with amazement. This act was a trespass against God.

IV. Uzziah's Punishment (vv. 19-21).

While raging in his wrath and about to turn himself he was smitten with leprosy, a dreadful, incurable and unclean disease. This judgment came upon him as a consequence of his overweening pride and vanity. He was thrust out of the sanctuary—excluded from God's house. Indeed, his own conscience smote him, and he hurriedly went out because he knew that the Lord had smitten him. He not only was excluded from the place of worship, but was dejected. His son Jotham was made regent. His judgment was:

1. Judgment. The Lord smote him while he was in the temple, with cancer in him. Frequently God's judgments are speedy. 2. Severe. The leprosy broke forth upon his forehead. The same judgment befell Miriam for speaking against Moses (Num. 12:10), and Gehazi for lying to Elisha (II Kings 5:27). Great sins demand severe punishment. 3. Conspicuous. Azariah and all the priests looked up and beheld the leprosy (v. 20). The spot on Uzziah's forehead proclaimed to all the object of God's wrath. How many today are bearing about the marks of sin—God's judgment! 4. Humiliating. He was henceforth unclean—cut off from the congregation. This is what sin always does. 5. Fatal. It ended in death. "The wages of sin is death" (Rom. 6:23).

The Accommodating Verger

A new curate wanted to make a good impression, if being his first sermon. He was determined not to neglect his personal appearance. Smoothing his hair, he said to the old verger: "Could you get me a glass? A small one will do."

The verger hurried away, but soon returned concealing something under his coat. "I know what nervousness is," he said. "I've brought you a whole bottle."

Something to Keep in Mind

A Paris professor has it now. Six filles in four months had a family of 3,995,696,387,755 descendants. This information should be pondered over by us all during the remaining months of the winter, so that we may be duly zealous in awaiting the fly when the flyswatting season arrives.

In China are to be found in circulation

lumps of gold and silver-bearing marks which show that they were first issued hundreds of years ago. In shape they are square, oval or oblong, and they weigh anything up to one and a half pounds.

The Ganges, India's most important

river, is 1,567 miles long, and is navigable for a distance of 370 miles from the sea.

NEVER COOK UP COLD MEAT WITHOUT IT

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. The Bayer name mark (trademark) in Canada is the Bayer Cross. Aspirin is a registered trademark of Bayer Company. Bayer is a registered trademark of Bayer Company. Bayer is a registered trademark of Bayer Company.

Where, Indeed

A Canadian who wants to knock this country these days should first take a look around the world and decide where he could pitch his tent and be better off.

COULDN'T DO HOUSEWORK,

HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But when a woman is strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. It is any wonder that the heart becomes affected and also gets irritable and nervous has hot flashes, faint and dizzy spells, smothering and sinking spells and can sleep at night.

To all women whose heart is weak and whose nerves are unstrung we would recommend

MILBURN'S

HEART AND NERVE PILLS

as the best remedy to tone up the system and strengthen the weakened organs. Mrs. Daniel Bezanon, Loganville, N.S., writes:—"As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me."

My heart was so bad at night I could not sleep, I would lie smothering spells, and was so weak I could not do my household work. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is.

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Canada as a Dependency

Realization of Fact Means Better Citizens Declares Eastern M.P.

Speaking to the Reform Club at Montreal, W. F. Carroll, M.P. for Cape Breton South and Richmond, deprecated the fact that Canada was a nation and insisted that such was the case even though we have all political and religious freedom. "We are not a nation," he said, "and the quicker we undeceive ourselves, the sooner we will become better Canadians. We are a dependency of the British crown. Nationalism implies the right to make treaties and settle our own affairs. If you want proof that we are not a nation look at the privy council. Not a bill becomes law until it is sanctioned by the King in the person of the Governor-General." He believed that nationalism would develop greater statesmen. In conclusion, Mr. Carroll said:

"I am not talking with a view to independence or with a view to severing our connection with the mother country."

"Them Was the Days!"

It has been discovered that in Gardiner, Maine, a school teacher was paid \$1 a week in 1932, the town paying an additional dollar for her board. And probably some of the voters were grumbling at the reckless extravagance the select men—Boston Transcript.

LOCAL INTEREST HAPPENINGS

BORN—To Mr and Mrs McCreath, on Thursday, April 20th, a boy.

BORN—To Mr and Mrs H. Edwards, on Friday, April 21st, a girl.

BORN—To Mr and Mrs Fred Sharpe, on Sunday, April 23rd, a boy.

BORN—To Mr and Mrs All Aiken, of Heath, at the Home maternity home, on Sunday, April 23rd, a girl.

BORN—To Mr and Mrs Carl Clymont, on Monday April 24th, a boy.

Owing to the absence of the pastor, Mrs H. Bagnall, will conduct the Methodist services at both Grace church and Green shields on Sunday next.

We are glad to know that Miss M. Coleman who was on the sick list last week has now recovered nicely.

Mayor Lally paid a visit to the Municipal department in Edmonton last week end in the interests of town affairs in general and town finances in particular.

The W.A. of St Thomas' church wish all to remember that on account of the date of their sale of work clashing with the U.F.W.A. bazaar they have postponed their affair until May 20th.

Miss M. Donovan who was indisposed last week is now fully recovered and is back at business.

It is pleasing to relate that the town bonds which were recently offered on the money market have been purchased by the Ross Alger Co. of Edmonton. The price was 90 and 91, which is figured a good price for this class of security.

Messrs Stuart and Bowerman, our local auctioneers were both visitors to the city on Monday in attendance at a convention of "sale cryers" from all over the province. Of course, they had a good time.

Mr James Primrose motored over from Islay for a week end visit at the parental home.

Notice—Big Dance on April 28th under the auspices of the Green-shields Base Ball Club at Mr Wilkie's Barn. Good floor and good music. Admission: Gentlemen \$1.00. Ladies please bring cakes. Don't miss the good time. Everybody welcome.

Mrs Fred Moffatt, from Prince George, with her two little daughters, is here to spend a holiday with her parents, Mr and Mrs P. D. Laird.

Owing to the necessity of putting in new tubes in the boiler and erecting the new smoke stack at the power house, our city was "cast into outer darkness" at the week end. But Pete Laird says she's fixed now to stay—oh, an awful long time!

Mrs Nachtergaele, of Chauvin, is paying a visit to her daughter, Mrs Geo. Glass these days.

We are sorry to learn that upon attending the hospital in Edmonton for specialist medical advice Mrs Henry Ward was informed that she will have to undergo another operation. We extend the sympathies of her many friends and express hopes of her speedy and complete recovery.

Mr W. Sharp, of Edgerton was a week end visitor to town.

By way of a fraternal visit, Editor J. W. Johnstone, of Alliance, with his good wife and daughter, motored over to see us on Sunday, travelling by way of Hardisty and the park. Come again, brother.

The local lodge of Oddfellows are arranging a fraternal visit to their brothers at Edgerton on Thursday when degree work will be put on.

Miss Cox, of Edgerton, was the week end guest of Mrs J. C. McLeod.

The Atlas Lumber Co. wish to announce that they have just received plan books of the newest and most up-to-date houses and bungalows. These show all the latest combinations of colors for outside painting.

Dr H.H. Lockwood has invested in a 1922 McLaughlin Four, and "she sure is some nice machine, boys!"

We are glad to know that Mr H. Plaxton, who recently underwent an operation for tonsillitis, is now recovering nicely.

LAND FOR SALE

THE SOLDIER SETTLEMENT BOARD OF CANADA

Offers for sale by Public Tender:
The North East quarter of Section Thirty-two (32) Township Forty-six (46) Range Ten (10) West of the Fourth (4th) Meridian, Jarow P.O.

Terms of sale may be obtained from application to the undersigned.
Tenders will be opened on Monday, May 8th, 1922 at 10 A.M.
The highest or any tender not necessarily accepted.
Tenders should be marked "Sale No. 96."
G. McMORRIS,
District Superintendent
Williamson Block,
Edmonton, Alberta

Mr Geo. Rosholt had a session with the dentist last week, and if he feels anything like the Editor—well he has our deepest sympathies. Nuff sed!

A very pleasant time was spent at the home of Mrs R. R. Arkroyd on Friday evening last when cards and music were indulged in till the early hours.

Quite an epidemic of bonfires these days. But (all the while the fires are safe), let 'em burn. The town clean and beautiful should be the slogan.

Fence pliers may not be just the best things for extracting teeth, but—oh, darn it ask Peter, he knows! Funny how this "hard times" stuff works!

Mr A. M. Fraser arrived from Edmonton at the week end to take over the management of the local yard for the Imperial Lumber company.

It is particularly requested that our readers will not confuse the date of the W. A. sale of work. It will be held on May 20th, not the 6th as previously announced.

Mr and Mrs A. Allinson, of the oil well staff were in the city on business on Monday last.

Miss Geraldine Fieldhouse, who arrived in town last week end from Edmonton, started at her duties in charge of Pass-chendale school on Monday.

Mrs Eaton, of Lamont, with her daughter Mrs Hackett, who was visiting her daughter Mrs H. V. Fieldhouse for a short stay, returned home on Monday.

There has arrived at the Atlas Lbr yard a whole carload of the best Pennsylvania blacksmith coal ever unloaded here.
